Objective: Perceptions of illness affect cardiovascular disease (CVD) self-management. This study explores knowledge, attitudes, and beliefs regarding hypertension and hyperlipidemia management among 34 African-American men with hypertension and/or hyperlipidemia, age 40-65, living in the Southeastern United States.

Knowledge, Attitudes, and Beliefs Related to Hypertension ...

An attitude is a belief about something. It usually describes what we think is the ‘proper’ way of doing something. The attitudes that we feel very strongly about are usually called values. Other attitudes are not so important and are more like opinions. Sometimes our own attitudes can make us blind to other people’s values, opinions and needs.

Personal values, belief and attitudes - Personal values ...

Specifically, contrary to the psychological principle of “consistency,” which reflects the idea that people are rational and their behavior should be consistent with their KAB, there is abundant evidence that the cognitive and affective components of attitude and beliefs do not always match knowledge and behavior . Identification of KAB can inform campaigns regarding barriers and opportunities to awareness, action, and advocacy success.

Knowledge, Attitudes, and Beliefs Regarding Cardiovascular ...

Attitudes provide meaning (knowledge) for life. The knowledge function refers to our need for a world which is consistent and relatively stable. This allows us to predict what is likely to happen, and so gives us a sense of control. Attitudes can help us organize and structure our experience.

Attitudes and Behavior | Simply Psychology

Brief Description: A Knowledge, Attitude and Practices (KAP) survey is a quantitative method (predefined questions formatted in standardized questionnaires) that provides access to quantitative and qualitative information. KAP surveys reveal misconceptions or misunderstandings that may represent obstacles to the activities that we would like to implement and potential barriers to behavior change.
