Henri Bergson was the philosopher who, in an intellectual career stretching from the 1880s to the 1930s, provided a rigorous account of the real efficacy of time (which he called duration). This allowed him to conceive of creativity as the source of both psychological freedom and of life as an open system.

Bergson did see the parallel in meaning but the details were still leaving much to be desired in comparing times to see if actual differences existed. Guillaume recognized this need and so tried to return to Newtonian mechanics use of a single variable for universal time, which could be thought of as an average of sorts.
