Spinal cord injury: Recovery, stages, and support

Rehabilitation and Therapy after Spinal Cord Injuries. Spinal cord injuries are life-altering and permanent, but that doesn't mean they can't be improved. It takes a great degree of determination and stick-to-itiveness to get the spine back to a semblance of normalcy. Really, a whole village of physical therapists, doctors and cheerleaders are necessary to carry your spirits through the valley of rehab to a place where you can get your footing.

Rehabilitation and Therapy after Spinal Cord Injuries

Two factors that significantly affect how quickly you'll recover after spinal cord injury are timing and intensity of rehabilitation. The first 6 months following your SCI, your spinal cord has heightened levels of plasticity because it's trying to stabilize and heal itself to whatever extent it can as quickly as possible.

Full Recovery After Spinal Cord Injury: Is It Possible ...

Rehabilitation after spinal cord injury (SCI) can be a frustrating process—and the severity of your injury may dictate how long the rehab process will be for you. Fortunately, a team of multidisciplinary medical specialists will support you and your recovery. Doctors, nurses, occupational therapists, physical therapists, psychologists, speech therapists, orthotists, and recreational therapists are among the health care professionals who will help reduce your pain and regain function.

Rehab for Spinal Cord Injury - SpineUniverse

The rehabilitation process following a spinal cord injury typically begins in the acute care setting. Occupational therapy

plays an important role in the management of SCI. [2] Recent studies emphasize the importance of early occupational therapy, started immediately after the client is stable.

Rehabilitation in spinal cord injury - Wikipedia

The most recovery occurs in the first 6 months following a spinal cord injury. That's why, once your spinal cord injury is stabilized, you must start working on rehabilitation as soon as possible. This will help you develop the skills necessary to regain your independence. Which brings us to our next point:

Spinal Cord Injury Recovery: What are the Most Effective ...

After spinal cord injury, your spinal cord may go into spinal shock. This is when inflammation occurs which causes a temporary loss of sensory or motor functions below your level of injury. Spinal shock can last anywhere from days to weeks, but typically lasts around 4-6 weeks before functions gradually start to return.

Signs of Recovery from Spinal Cord Injury: What Can Improve?

Rehabilitation for incomplete spinal cord injuries can continue to be beneficial for many years, following the initial onset. At Hobbs Rehabilitation, we offer a variety of services for treatment, management and rehabilitation of spinal cord injuries at any stage.

Spinal Cord Injuries | Hobbs Neurological Rehabilitation

Understanding Spinal Cord Injury: Part 1 - The Body Before and After Injury (PDF) (en español) This fact sheet is intended to be a starting point for understanding the normal functions of the spinal cord

and how those functions might change after spinal cord injury.

What recovery is expected following spinal cord injury ...

Physiotherapy is a key component during the rehabilitation process following spinal cord injury and includes a variety of interventions that address multiple domains in the International Classification of Functioning, Disability and Health (ICF) including body function and structure, activity limitation, and participation, with many interventions directed at preventing, rather than treating, impairments, activity limitation and participation restrictions.

Physiotherapy Management of Individuals with Spinal Cord ...

One of the most important factors that affect spinal cord injury prognosis is the severity of your injury. The spinal cord relays information between the brain and body. After a spinal cord injury, information cannot pass the site of injury, which results in paralysis. A spinal cord injury can be complete or incomplete.

Spinal Cord Injury Prognosis: What Are Your Chances of ...

The best chance for recovery of function following spinal cord injury is through prompt treatment. Early surgical decompression and stabilization leads to better recovery. Aggressive physical therapy and rehabilitation after surgery also maximizes recovery. The majority of recovery occurs within the first six

months after injury.

Spinal Cord Injury: Levels, Treatment, Symptoms, Recovery
