Blink

The Power of Thinking Without Thinking *Back Bay Books*

From the #1 bestselling author of *The Bomber Mafia*, the landmark book that has revolutionized the way we understand leadership and decision making. In his breakthrough bestseller *The Tipping Point*, Malcolm Gladwell redefined how we understand the world around us. Now, in *Blink*, he revolutionizes the way we understand the world within. *Blink* is a book about

how we think without thinking, about choices that seem to be made in an instant--in the blink of an eye--that actually aren't as simple as they seem. Why are some people brilliant decision makers, while others are consistently inept? Why do some people follow their instincts and win, while others end up stumbling into error? How do our brains really work--in the office, in the classroom, in the kitchen, and in the bedroom? And why are the best decisions often those that are impossible to explain to others? In *Blink* we meet the psychologist who has learned to predict whether a marriage will last, based on a few minutes of observing a couple; the tennis coach who knows when a player will double-fault before the racket even makes contact with the ball; the antiquities experts who recognize a fake at a glance. Here, too, are great failures of "blink": the election of Warren Harding; "New Coke"; and the shooting of Amadou Diallo by police. *Blink* reveals that great decision makers aren't those who process the most information or spend the most time deliberating, but those who have perfected the art of "thin-slicing"--filtering the very few factors that matter from an overwhelming number of variables.

Short Cuts to Better Decision Making *Penguin UK*

Think less ♦ and know more. A sportsman can catch a ball without calculating its speed or distance. A group of amateurs beat the experts at playing the stock market. A man falls for the right woman even though she ♦s ♦wrong ♦ on paper. All these people succeeded by trusting their instincts ♦ but how does it

work? In *Gut Feelings* psychologist and behavioural expert Gerd Gigerenzer reveals the secrets of fast and effective decision-making. He explains that, in an uncertain world, sometimes we have to ignore too much information and rely on our brain ♦s ♦short cut ♦, or heuristic. By explaining how intuition works and analyzing the techniques that people use to make good decisions ♦ whether it ♦s in personnel selection or heart surgery ♦ Gigerenzer will show you why gut thinking can change your world.

Think!

Why Crucial Decisions Can't Be Made in the Blink of an Eye *Simon and Schuster*

This isn't the time to Blink. It's time to THINK! -- before it's too late. Outraged by the downward spiral of American intellect and culture, Michael R. LeGault offers the flip side of Malcolm Gladwell's bestselling phenomenon, Blink, which theorized that our best decision-making is done on impulse, without factual knowledge or critical analysis. If bestselling books are advising us to not think, LeGault argues, it comes as no surprise that sharp, incisive reasoning has become a lost art in the daily life of Americans. Somewhere along the line, the Age of Reason morphed into the Age of Emotion; this systemic erosion is costing time, money, jobs, and lives in the twenty-first century, leading to less fulfillment and growing dysfunction. LeGault provides a bold, controversial, and objective analysis of the causes and solutions for:

- the erosion of growth and market share at many established American companies, big and small, which appear to

have less chance of achieving the dynamic expansion of the past

- permissive parenting and low standards that have caused an academic crisis among our children -- body weights rise while grades plummet
- America's growing political polarization, which is a result of our reluctance to think outside our comfort zone
- faulty planning and failure to act on information at all levels that has led to preventable disasters, such as the Hurricane Katrina meltdown
- a culture of image and instant gratification, fed by reality shows and computer games, that has rendered curiosity of the mind and spirit all but obsolete
- stress, aversion to taking risks, and therapy that are replacing the traditional American "can do" mind-set. Far from perpetuating the stereotype of the complacent American, LeGault's no-holds-barred analysis asks more of us than any other societal overview: America can fulfill its greatest potential starting today, and we need smart teachers, smart health care workers, smart sales representatives, smart students, smart mechanics, and smart leaders to make it happen. Now is the time to THINK! -- because a mind truly is a terrible thing to waste.

David and Goliath

Underdogs, Misfits, and the Art of Battling Giants *Little, Brown*

Explore the power of the underdog in Malcolm Gladwell's dazzling examination of success, motivation, and the role of adversity in shaping our lives, from the bestselling author of The Bomber Mafia. Three thousand years ago on a battlefield in ancient Palestine, a shepherd boy felled a mighty warrior with nothing

more than a stone and a sling, and ever since then the names of David and Goliath have stood for battles between underdogs and giants. David's victory was improbable and miraculous. He shouldn't have won. Or should he have? In *David and Goliath*, Malcolm Gladwell challenges how we think about obstacles and disadvantages, offering a new interpretation of what it means to be discriminated against, or cope with a disability, or lose a parent, or attend a mediocre school, or suffer from any number of other apparent setbacks. Gladwell begins with the real story of what happened between the giant and the shepherd boy those many years ago. From there, *David and Goliath* examines Northern Ireland's Troubles, the minds of cancer researchers and civil rights leaders, murder and the high costs of revenge, and the dynamics of successful and unsuccessful classrooms—all to demonstrate how much of what is beautiful and important in the world arises from what looks like suffering and adversity. In the tradition of Gladwell's previous bestsellers—*The Tipping Point*, *Blink*, *Outliers* and *What the Dog Saw*—*David and Goliath* draws upon history, psychology, and powerful storytelling to reshape the way we think of the world around us.

The Genius Within

Smart Pills, Brain Hacks and Adventures in Intelligence *Pan Macmillan*

From the Sunday Times bestselling author of *The Man Who Couldn't Stop*. 'Witty, sharp and enlightening . . . This book will make you smarter' Adam Rutherford. What if you have more intelligence than you realize? What if there is a genius inside you,

just waiting to be released? And what if the route to better brain power is not hard work or thousands of hours of practice but to simply swallow a pill? In *The Genius Within*, bestselling author David Adam explores the ground-breaking neuroscience of cognitive enhancement that is changing the way the brain and the mind works – to make it better, sharper, more focused and, yes, more intelligent. Sharing his own experiments with revolutionary smart drugs and electrical brain stimulation, he delves into the sinister history of intelligence tests, meets savants and brain hackers and reveals how he boosted his own IQ to cheat his way into Mensa. Going to the heart of how we consider, measure and judge mental ability, *The Genius Within* asks difficult questions about the science that could rank and define us, and inevitably shape our future.

Talking to Strangers

What We Should Know about the People We Don't Know *Little, Brown*

Malcolm Gladwell, host of the podcast *Revisionist History* and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? *Talking to Strangers* is a

classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

Blank

The Power of Not Actually Thinking at All (A Mindless Parody) *Harper Collins*

A smart, hilarious parody of Malcolm Gladwell's bestselling *Blink*. Stop! Don't think! You already know what this book is about. That is the power of *Blank*: the power of not actually thinking at all. Using what scientific researchers call 'Extra-Lean Deli Slicing' (or would, if they actually bothered to research it), your brain has already decided whether you're going to like *Blank*, whether its cover goes with your shirt, and whether it will make you look smart if somebody sees you reading it on the train. Chances are you and your shirt are both liking it a lot, you're going to buy several copies, and you don't even know why! That's why you've absolutely got to read *Blank*: to find out why your brain keeps

doing these wacky things without your permission. In *Blank*, a hilarious parody of the No. 1 bestseller it looks eerily like (and sort of rhymes with) and that your brain wisely advised you to just read a review or magazine excerpt about while avoiding the actual book itself, the brilliantly impulsive and slightly irresponsible Noah Tall explains how people as diverse as General Custer, Roy Rogers, a semi-famous rock star, and the entire New York City Police Department either won big or lost miserably as a result of their minds going completely blank.

The Bomber Mafia

A Dream, a Temptation, and the Longest Night of the Second World War *Little, Brown*

An exploration of how technology and best intentions collide in the heat of war A New York Times Book Review Editors' Choice In *The Bomber Mafia*, Malcolm Gladwell weaves together the stories of a Dutch genius and his homemade computer, a band of brothers in central Alabama, a British psychopath, and pyromaniacal chemists at Harvard to examine one of the greatest moral challenges in modern American history. Most military thinkers in the years leading up to World War II saw the airplane as an afterthought. But a small band of idealistic strategists, the "Bomber Mafia," asked: What if precision bombing could cripple the enemy and make war far less lethal? In contrast, the bombing of Tokyo on the deadliest night of the war was the brainchild of General Curtis LeMay, whose brutal pragmatism and scorched-earth tactics in Japan cost thousands of civilian lives, but may have spared even more by averting a planned US invasion. In *The*

Bomber Mafia, Gladwell asks, “Was it worth it?” Things might have gone differently had LeMay’s predecessor, General Haywood Hansell, remained in charge. Hansell believed in precision bombing, but when he and Curtis LeMay squared off for a leadership handover in the jungles of Guam, LeMay emerged victorious, leading to the darkest night of World War II. The Bomber Mafia is a riveting tale of persistence, innovation, and the incalculable wages of war.

Cybercognition

Brain, behaviour and the digital world *SAGE*

Technology is developing rapidly. It is an essential part of how we live our daily lives – in a mental and physical sense, and in professional and personal environments. Cybercognition explores the ideas of technology addiction, brain training and much more, and will provide students with a guide to understanding concepts related to the online world. It answers important questions: What is the impact of digital technology on our learning, memory, attention, problem-solving and decision making? If we continue to use digital technology on a large scale, can it change the way we think? Can human cognition keep up with technology? Suitable for students on Cyberpsychology and Cognitive Psychology courses at all levels, as well as anyone with an inquiring mind.

What the Dog Saw

And Other Adventures *Penguin UK*

Malcolm Gladwell asks the questions you never even thought to

ask (and will change the way you think) about everything from criminal profiling to ketchup.

Thinking in Bets

Making Smarter Decisions When You Don't Have All the Facts *Penguin*

Wall Street Journal bestseller! Poker champion turned business consultant Annie Duke teaches you how to get comfortable with uncertainty and make better decisions as a result. In Super Bowl XLIX, Seahawks coach Pete Carroll made one of the most controversial calls in football history: With 26 seconds remaining, and trailing by four at the Patriots' one-yard line, he called for a pass instead of a hand off to his star running back. The pass was intercepted and the Seahawks lost. Critics called it the dumbest play in history. But was the call really that bad? Or did Carroll actually make a great move that was ruined by bad luck? Even the best decision doesn't yield the best outcome every time. There's always an element of luck that you can't control, and there is always information that is hidden from view. So the key to long-term success (and avoiding worrying yourself to death) is to think in bets: How sure am I? What are the possible ways things could turn out? What decision has the highest odds of success? Did I land in the unlucky 10% on the strategy that works 90% of the time? Or is my success attributable to dumb luck rather than great decision making? Annie Duke, a former World Series of Poker champion turned business consultant, draws on examples from business, sports, politics, and (of course) poker to share tools anyone can use to embrace uncertainty and make

better decisions. For most people, it's difficult to say "I'm not sure" in a world that values and, even, rewards the appearance of certainty. But professional poker players are comfortable with the fact that great decisions don't always lead to great outcomes and bad decisions don't always lead to bad outcomes. By shifting your thinking from a need for certainty to a goal of accurately assessing what you know and what you don't, you'll be less vulnerable to reactive emotions, knee-jerk biases, and destructive habits in your decision making. You'll become more confident, calm, compassionate and successful in the long run.

Willpower

Rediscovering the Greatest Human Strength *Penguin*

One of the world's most esteemed and influential psychologists, Roy F. Baumeister, teams with New York Times science writer John Tierney to reveal the secrets of self-control and how to master it. "Deep and provocative analysis of people's battle with temptation and masterful insights into understanding willpower: why we have it, why we don't, and how to build it. A terrific read." —Ravi Dhar, Yale School of Management, Director of Center for Customer Insights Pioneering research psychologist Roy F. Baumeister collaborates with New York Times science writer John Tierney to revolutionize our understanding of the most coveted human virtue: self-control. Drawing on cutting-edge research and the wisdom of real-life experts, *Willpower* shares lessons on how to focus our strength, resist temptation, and redirect our lives. It shows readers how to be realistic when setting goals, monitor their progress, and how to keep faith when they falter. By

blending practical wisdom with the best of recent research science, *Willpower* makes it clear that whatever we seek—from happiness to good health to financial security—we won't reach our goals without first learning to harness self-control.

Malcolm Gladwell's Blink

The Power of Thinking Without Thinking *Createspace Independent Publishing Platform*

This is a Summary of Malcolm Gladwell's *Blink: The Power of Thinking Without Thinking*. Decisive

How to Make Better Choices in Life and Work *Random House Canada*

The four principles that can help us to overcome our brains' natural biases to make better, more informed decisions--in our lives, careers, families and organizations. In *Decisive*, Chip Heath and Dan Heath, the bestselling authors of *Made to Stick* and *Switch*, tackle the thorny problem of how to overcome our natural biases and irrational thinking to make better decisions, about our work, lives, companies and careers. When it comes to decision making, our brains are flawed instruments. But given that we are biologically hard-wired to act foolishly and behave irrationally at times, how can we do better? A number of recent bestsellers have identified how irrational our decision making can be. But being aware of a bias doesn't correct it, just as knowing that you are nearsighted doesn't help you to see better. In *Decisive*, the Heath brothers, drawing on extensive studies, stories and

research, offer specific, practical tools that can help us to think more clearly about our options, and get out of our heads, to improve our decision making, at work and at home.

Complications

A Surgeon's Notes on an Imperfect Science *Metropolitan Books*

A brilliant and courageous doctor reveals, in gripping accounts of true cases, the power and limits of modern medicine. Sometimes in medicine the only way to know what is truly going on in a patient is to operate, to look inside with one's own eyes. This book is exploratory surgery on medicine itself, laying bare a science not in its idealized form but as it actually is -- complicated, perplexing, and profoundly human. Atul Gawande offers an unflinching view from the scalpel's edge, where science is ambiguous, information is limited, the stakes are high, yet decisions must be made. In dramatic and revealing stories of patients and doctors, he explores how deadly mistakes occur and why good surgeons go bad. He also shows us what happens when medicine comes up against the inexplicable: an architect with incapacitating back pain for which there is no physical cause; a young woman with nausea that won't go away; a television newscaster whose blushing is so severe that she cannot do her job. Gawande offers a richly detailed portrait of the people and the science, even as he tackles the paradoxes and imperfections inherent in caring for human lives. At once tough-minded and humane, *Complications* is a new kind of medical writing, nuanced and lucid, unafraid to confront the conflicts and uncertainties that

lie at the heart of modern medicine, yet always alive to the possibilities of wisdom in this extraordinary endeavor. *Complications* is a 2002 National Book Award Finalist for Nonfiction.

Do Humankind's Best Days Lie Ahead?

The Munk Debates *House of Anansi*

Progress. It is one of the animating concepts of the modern era. From the Enlightenment onwards, the West has had an enduring belief that through the evolution of institutions, innovations, and ideas, the human condition is improving. This process is supposedly accelerating as new technologies, individual freedoms, and the spread of global norms empower individuals and societies around the world. But is progress inevitable? Its critics argue that human civilization has become different, not better, over the last two and a half centuries. What is seen as a breakthrough or innovation in one period becomes a setback or limitation in another. In short, progress is an ideology not a fact; a way of thinking about the world as opposed to a description of reality. In the seventeenth semi-annual Munk Debates, which was held in Toronto on November 6, 2015, pioneering cognitive scientist Steven Pinker and bestselling author Matt Ridley squared off against noted philosopher Alain de Botton and bestselling author Malcolm Gladwell to debate whether humankind's best days lie ahead.

The Wayward Mind

An Intimate History of the Unconscious *Little Brown Uk*

The unconscious has had a long and chequered history. For at least the last 4,000 years, societies have concocted comforting fables in the face of the recurrent puzzles of human existence - death, dreaming, madness, possession, inspiration - that invariably rely on some notion of the unconscious. Supernatural 'fairy stories' need some internal proxy or contact point through which the influence of demons and spirits can flow. And without such gods and forces, some psychological machinery is needed to take over their work. But what IS the unconscious? Is it 'God's viceroy', the soul? Is it the locked ward of Freudian desire? Is the subliminal mind the source of the sublime emotions of the Romantics? Is it the mental microchip of cognitive science? Or is it simply the brain?

The Selfish Gene

40th Anniversary edition *Oxford University Press*

The million copy international bestseller, critically acclaimed and translated into over 25 languages. As influential today as when it was first published, The Selfish Gene has become a classic exposition of evolutionary thought. Professor Dawkins articulates a gene's eye view of evolution - a view giving centre stage to these persistent units of information, and in which organisms can be seen as vehicles for their replication. This imaginative, powerful, and stylistically brilliant work not only brought the

insights of Neo-Darwinism to a wide audience, but galvanized the biology community, generating much debate and stimulating whole new areas of research. Forty years later, its insights remain as relevant today as on the day it was published. This 40th anniversary edition includes a new epilogue from the author discussing the continuing relevance of these ideas in evolutionary biology today, as well as the original prefaces and foreword, and extracts from early reviews. Oxford Landmark Science books are 'must-read' classics of modern science writing which have crystallized big ideas, and shaped the way we think.

The Bomber Mafia

A Story Set in War *Penguin UK*

THE NEW YORK TIMES BESTSELLER 'A parable written for the age of technological disruption . . . brilliantly told' Sunday Times The international bestselling author returns with an exploration of one of the grandest obsessions of the twentieth century 'The Bomber Mafia is a case study in how dreams go awry. When some shiny new idea drops from the heavens, it does not land softly in our laps. It lands hard, on the ground, and shatters.' In the years before the Second World War, in a sleepy air force base in central Alabama, a small group of renegade pilots put forth a radical idea. What if we made bombing so accurate that wars could be fought entirely from the air? What if we could make the brutal clashes between armies on the ground a thing of the past? This book tells the story of what happened when that dream was put to the test. The Bomber Mafia follows the stories of a reclusive Dutch genius and his homemade computer, Winston Churchill's

forbidding best friend, a team of pyromaniacal chemists at Harvard, a brilliant pilot who sang vaudeville tunes to his crew, and the bomber commander, Curtis Emerson LeMay, who would order the bloodiest attack of the Second World War. In this tale of innovation and obsession, Gladwell asks: what happens when technology and best intentions collide in the heat of war? And what is the price of progress?

Johnny Hiro: Half Asian, All Hero *Tor Books*

Johnny Hiro, a hardworking busboy, lives in Brooklyn with his flighty but lovable girlfriend Mayumi. Every day, he struggles to make ends meet while fighting giant monsters, running over rooftops from crazed waiters, fending off businessmen-turned-samurai, or having the occasional conversation with Judge Judy, Coolio, or Alton Brown. With Fred Chao's signature style and laugh-out-loud humor, Johnny Hiro presents the quirky trials and misadventures of a modern-day hero trying to find his slice of the good life. This delightfully absurdist romp through the trials and chores of living in New York was nominated for four Eisner Awards, including for best new series, and for the Russ Manning Award. It was selected for the anthology Best American Comics 2010. Prepare to be blown away by the greatest adventure of them all: being an adult. Sources of Power

How People Make Decisions *MIT Press*

Anyone who watches the television news has seen images of firefighters rescuing people from burning buildings and paramedics treating bombing victims. How do these individuals make the split-second decisions that save lives? Most studies of decision making, based on artificial tasks assigned in laboratory settings, view people as biased and unskilled. Gary Klein is one of the developers of the naturalistic decision making approach, which views people as inherently skilled and experienced. It documents human strengths and capabilities that so far have been downplayed or ignored. Since 1985, Klein has conducted fieldwork to find out how people tackle challenges in difficult, nonroutine situations. Sources of Power is based on observations of humans acting under such real-life constraints as time pressure, high stakes, personal responsibility, and shifting conditions. The professionals studied include firefighters, critical care nurses, pilots, nuclear power plant operators, battle planners, and chess masters. Each chapter builds on key incidents and examples to make the description of the methodology and phenomena more vivid. In addition to providing information that can be used by professionals in management, psychology, engineering, and other fields, the book presents an overview of the research approach of naturalistic decision making and expands our knowledge of the strengths people bring to difficult tasks.

Power of Thinking Big *CreateSpace*

Success is measured not by the size of your brain, but rather by the size of your thinking. This intrigues a lot of people, and if you observe how people behave, you will have a clear understanding of what success really means. Time and time again, history and experience have proved that the degree of our general satisfaction and happiness is dependent on how we think. There is magic in thinking big! Positive thinking helps accomplish so much in our life, but unfortunately not everyone thinks that way. We are all products of our thinking that goes within and around us. There is an environment around us that exerts all sorts of forces on your thinking; some will push you up the ladder while others will pull you down. We have been told many times that opportunities to lead are no longer there; hence we should be content with who we are without having positive aspirations on leadership. The petty environment surrounding us also has its own narrative concerning our lives. It constantly tells us that whatever is destined will eventually happen and we have no control over it. Leaving your fate in the hands of chance can potentially ruin your life and make you miserable. Therefore, before you start giving up your dreams of a finer home or giving a better life for your children, stand firm and resist resigning to fate. Do not lie down and wait to die. Success is worth every effort you expend, and every step you make pays a dividend. Even in an environment where competition is intense, you still can succeed as long as your thinking is in the positive quadrant of your mind frame. The basic concepts and principles that underlie the power of thinking big are drawn from the highest-pedigree sources and the finest thinking minds such as Emerson

who said "Great men are those who see that thoughts rule the world." Milton who wrote in his book *Paradise Lost*, "The mind is its own place and in itself can make a heaven of hell or a hell of heaven." Shakespeare made an interesting observation about thinking which he summarized and said "There is nothing either good or bad except that thinking makes it so." Proof is everywhere that thinking big indeed works. When you look at the lives of people who you consider as big thinkers, you will be amazed at their winning success, happiness and achievements. This book will show you proven strategies from different life situations that will turn your life around.

An Empire Wilderness

Traveling Into America's Future *Vintage*

Having reported on some of the world's most violent, least understood regions in his bestsellers *Balkan Ghosts* and *The Ends of the Earth*, Robert Kaplan now returns to his native land, the United States of America. Traveling, like Tocqueville and John Gunther before him, through a political and cultural landscape in transition, Kaplan reveals a nation shedding a familiar identity as it assumes a radically new one. *An Empire Wilderness* opens in Fort Leavenworth, Kansas, where the first white settlers moved into Indian country and where Manifest Destiny was born. In a world whose future conflicts can barely be imagined, it is also the place where the army trains its men to fight the next war. "A nostalgic view of the United States is deliberately cultivated here," Kaplan writes, "as if to bind the uncertain future to a reliable past." From Fort Leavenworth, Kaplan travels west to the

great cities of the heartland--to St. Louis, once a glorious shipping center expected to outshine imperial Rome and now touted, with its desolate inner city and miles of suburban gated communities, as "the most average American city." Kaplan continues west to Omaha; down through California; north from Mexico, across Arizona, New Mexico, and Texas; up to Montana and Canada, and back through Oregon. He visits Mexican border settlements and dust-blown county sheriffs' offices, Indian reservations and nuclear bomb plants, cattle ranches in the Oklahoma Panhandle, glacier-mantled forests in the Pacific Northwest, swanky postsuburban sprawls and grim bus terminals, and comes, at last, to the great battlefield at Vicksburg, Mississippi, where an earlier generation of Americans gave their lives for their vision of an American future. But what, if anything, he asks, will today's Americans fight and die for? At Vicksburg Kaplan contemplates the new America through which he has just traveled--an America of sharply polarized communities that draws its population from pools of talent far beyond its borders; an America where the distance between winners and losers grows exponentially as corporations assume gov-ernment functions and the wealthy find themselves more closely linked to their business associates in India and China than to their poorer neighbors a few miles away; an America where old loyalties and allegiances are vanishing and new ones are only beginning to emerge. The new America he found is in the pages of this book. Kaplan gives a precise and chilling vision of how the most successful nation the world has ever known is entering the final, and highly uncertain, phase of its history.

Summary

Blink by Malcolm Gladwell: The Power Of Thinking Without Thinking

Blink by Malcolm Gladwell: Book Summary IMPORTANT NOTE: This is a book summary of Blink by Malcolm Gladwell - this is NOT the original book. ORIGINAL BOOK DESCRIPTION: Blink: The Power of Thinking Without Thinking by Malcolm Gladwell In his landmark bestseller *The Tipping Point*, Malcolm Gladwell redefined how we understand the world around us. Now, in *Blink*, he revolutionizes the way we understand the world within. *Blink* is a book about how we think without thinking, about choices that seem to be made in an instant-in the blink of an eye-that actually aren't as simple as they seem. Why are some people brilliant decision makers, while others are consistently inept? Why do some people follow their instincts and win, while others end up stumbling into error? How do our brains really work-in the office, in the classroom, in the kitchen, and in the bedroom? And why are the best decisions often those that are impossible to explain to others? In *Blink* we meet the psychologist who has learned to predict whether a marriage will last, based on a few minutes of observing a couple; the tennis coach who knows when a player will double-fault before the racket even makes contact with the ball; the antiquities experts who recognize a fake at a glance. Here, too, are great failures of "blink" the election of Warren Harding; "New Coke"; and the shooting of Amadou Diallo by police. *Blink* reveals that great decision makers aren't those who process the most information or spend the most time deliberating, but those who have perfected the art of "thin-

slicing"-filtering the very few factors that matter from an overwhelming number of variables. **** Executive book summary of Blink by Malcolm Gladwell - Book Summary by Dean's Library

Before You Know It

The Unconscious Reasons We Do What We Do *Simon and Schuster*

Dr. John Bargh, the world's leading expert on the unconscious

mind, presents a "brilliant and convincing book" (Malcolm Gladwell) cited as an outstanding read of 2017 by Business Insider and The Financial Times—giving us an entirely new understanding of the hidden mental processes that secretly govern every aspect of our behavior. For more than three decades, Dr. John Bargh has conducted revolutionary research into the unconscious mind, research featured in bestsellers like Blink and Thinking Fast and Slow. Now, in what Dr. John Gottman said was "the most important and exciting book in psychology that has been written in the past twenty years," Dr. Bargh takes us on an entertaining and enlightening tour of the forces that affect everyday behavior while transforming our understanding of ourselves in profound ways. Dr. Bargh takes us into his labs at New York University and Yale—where he and his colleagues have discovered how the unconscious guides our behavior, goals, and motivations in areas like race relations, parenting, business, consumer behavior, and addiction. With infectious enthusiasm he reveals what science now knows about the pervasive influence of the unconscious mind in who we choose to date or vote for, what we buy, where we live, how we perform on tests and in job interviews, and much more. Because the unconscious works in ways we are completely unaware of, Before You Know It is full of surprising and entertaining revelations as well as useful tricks to help you remember items on your to-do list, to shop smarter, and to sleep better. Before You Know It is "a fascinating compendium of landmark social-psychology research" (Publishers Weekly) and an introduction to a fabulous world that exists below the surface of your awareness and yet is the key to knowing yourself and unlocking new ways of thinking, feeling, and behaving.

How Doctors Think *HarperCollins*

On average, a physician will interrupt a patient describing her symptoms within eighteen seconds. In that short time, many doctors decide on the likely diagnosis and best treatment. Often, decisions made this way are correct, but at crucial moments they can also be wrong -- with catastrophic consequences. In this myth-shattering book, Jerome Groopman pinpoints the forces and thought processes behind the decisions doctors make. Groopman explores why doctors err and shows when and how they can -- with our help -- avoid snap judgments, embrace uncertainty, communicate effectively, and deploy other skills that can profoundly impact our health. This book is the first to describe in detail the warning signs of erroneous medical thinking and reveal how new technologies may actually hinder accurate diagnoses. How Doctors Think offers direct, intelligent questions patients can ask their doctors to help them get back on track. Groopman draws on a wealth of research, extensive interviews with some of the country's best doctors, and his own experiences as a doctor and as a patient. He has learned many of the lessons in this book the hard way, from his own mistakes and from errors his doctors made in treating his own debilitating medical problems. How Doctors Think reveals a profound new view of twenty-first-century medical practice, giving doctors and patients the vital information they need to make better judgments together.

Here's some feedback from some others who recommend the book: "Will is a great storyteller, and his use of these connections makes this book easy to read but also memorable. His focus on 'purpose'-going beyond what you do in school-is something that all leaders should really consider if they are going to make a difference in both their professional and personal lives." -George Couros, Principal, founder of ConnectedPrincipals.com, and an Innovative Teaching, Learning and Leadership consultant "Will generously shares experiences from his personal and professional life to remind principals of the big picture as well as the small details that are essential to the success of our school communities...Being a school leader can be lonely work, as the role of principal is only truly understood by those who have served in the position. Mr. Parker has utilized his time occupying the principal's office to develop practical yet inspiring tips for administrators. I'm excited to politely steal many of his great ideas with my own students and staff this school year!" -Rachel Skerritt, Principal of Eastern Senior High School, a

D.C. Public School. 2013 Principal Ambassador Fellow for the U.S. Department of Education "Will writes with passion, conviction and insight. This book will equip you with the tools you'll need to face the frustrations you're sure to encounter as an educator, while enabling to you find renewed purpose and meaning as you influence your students to be the best they can be." -Daniel Wong, author of *The Happy Student* "This book explains the why of school leadership, not just the how. If you want to understand the right motives for school leadership and the steps to being a successful principal, you should read, *Principal Matters* by William D. Parker." -Jon Gordon, author of *The Energy Bus* and *Soup* This book captures the essence of effective teamwork and leadership. A great read for school administrators!" -Annette Breau, educator, co-author with Todd Whitaker of *The Ten Minute Inservice*

Don't Feed the Monkey Mind

How to Stop the Cycle of Anxiety, Fear, and Worry *New Harbinger Publications*

The very things we do to control anxiety can make anxiety worse. This unique guide offers a cognitive behavioral therapy (CBT)-based approach to help you recognize the constant chatter of your anxious "monkey mind," stop feeding anxious thoughts, and find the personal peace you crave. Ancient sages compared the human mind to a monkey: constantly chattering, hopping from branch to branch—endlessly moving from fear to safety. If you are one of the millions of people whose life is affected by anxiety, you are familiar with this process. Unfortunately, you can't switch

off the "monkey mind," but you can stop feeding the monkey—or stop rewarding it by avoiding the things you fear. Written by psychotherapist Jennifer Shannon, this book shows you how to stop anxious thoughts from taking over using proven-effective cognitive behavioral therapy (CBT), acceptance and commitment therapy (ACT), and mindfulness techniques, as well as fun illustrations. By following the exercises in this book, you'll learn to identify your own anxious thoughts, question those thoughts, and uncover the core fears at play. Once you stop feeding the monkey, there are no limits to how expansive your life can feel. This book will show you how anxiety can only continue as long as you try to avoid it. And, paradoxically, only by seeking out and confronting the things that make you anxious can you reverse the cycle that keeps your fears alive.

God's Supernatural Power *Destiny Image Publishers*

The modern church suffers from a serious identity crisis. Many Christians don't know who they really are in Christ. Churches languish in the land of lack, listless, powerless and with little influence in the world. This is about to change! God is birthing a new thing in the church. He is calling all believers to embrace the anointing of the Holy Spirit and walk in His divine power to change the world. The harvest is plentiful and the coming end-time revival needs a vibrant, anointed church that is ready to receive that harvest. God doesn't use just superstars; He longs to anoint ordinary people to do extraordinary things. He longs to anoint you. If not you, who? If not now, when? Now is the time!

Noise

A Flaw in Human Judgment *Little, Brown*

From the Nobel Prize-winning author of *Thinking, Fast and Slow* and the coauthor of *Nudge*, a revolutionary exploration of why people make bad judgments and how to make better ones—"a tour de force" (New York Times). Imagine that two doctors in the same city give different diagnoses to identical patients—or that two judges in the same courthouse give markedly different sentences to people who have committed the same crime. Suppose that different interviewers at the same firm make different decisions about indistinguishable job applicants—or that when a company is handling customer complaints, the resolution depends on who happens to answer the phone. Now imagine that the same doctor, the same judge, the same interviewer, or the same customer service agent makes different decisions depending on whether it is morning or afternoon, or Monday rather than Wednesday. These are examples of noise: variability in judgments that should be identical. In *Noise*, Daniel Kahneman, Olivier Sibony, and Cass R. Sunstein show the detrimental effects of noise in many fields, including medicine, law, economic forecasting, forensic science, bail, child protection, strategy, performance reviews, and personnel selection. Wherever there is judgment, there is noise. Yet, most of the time, individuals and organizations alike are unaware of it. They neglect noise. With a few simple remedies, people can reduce both noise and bias, and so make far better decisions. Packed with original ideas, and offering the same kinds of research-based insights that made *Thinking, Fast and Slow* and *Nudge* groundbreaking New York Times bestsellers, *Noise* explains how and why humans are so susceptible to noise in judgment—and what we can do about it.

How's Your Soul?

Why Everything that Matters Starts with the Inside You

Thomas Nelson

Judah Smith, New York Times bestselling author of *Jesus Is _____*, explores what it looks like to cultivate a healthy soul in the midst of a busy life and points readers to the soul's only true home and place of rest and fulfillment: God. "How's your soul?" It may seem like an odd question, but it's what pastor and bestselling author Judah Smith chooses to ask his friends, rather than "How are you?" It's a way to look past the externals and consider what's going on inside, in that essential part of us that is often overlooked in the struggle to make our way through everyday life. In the rush of living moment to moment, many of us find ourselves simply surviving, struggling daily with frustration, restlessness, boredom, and ever-fleeting joy. But if we would pause, we'd find that the things that matter most in life, what we are searching for in our busyness—stability, peace, hope, love—are rooted in the health of what Judah calls the "inside you." In *How's Your Soul?*, Judah explores that "inside you." Sharing his own, often humorous, mistakes and foibles, he helps us find our way through the emotional roller coasters of life to discover the soul-healing essentials of rest, responsibility, restraint, and relationships, all rooted in what he calls the soul's only true home—God himself. *How's Your Soul?* is an invitation to find lasting emotional satisfaction and stability by bringing our feelings into alignment with God's truth, moving beyond simply surviving, and learning how to live each day with eternal significance.

The Mathematics of Marriage

Dynamic Nonlinear Models *MIT Press*

Divorce rates are at an all-time high. But without a theoretical understanding of the processes related to marital stability and dissolution, it is difficult to design and evaluate new marriage interventions. The Mathematics of Marriage provides the foundation for a scientific theory of marital relations. The book does not rely on metaphors, but develops and applies a

mathematical model using difference equations. The work is the fulfillment of the goal to build a mathematical framework for the general system theory of families first suggested by Ludwig Von Bertalanffy in the 1960s. The book also presents a complete introduction to the mathematics involved in theory building and testing, and details the development of experiments and models. In one "marriage experiment," for example, the authors explored the effects of lowering or raising a couple's heart rates. Armed with their mathematical model, they were able to do real experiments to determine which processes were affected by their interventions. Applying ideas such as phase space, null clines, influence functions, inertia, and uninfluenced and influenced stable steady states (attractors), the authors show how other researchers can use the methods to weigh their own data with positive and negative weights. While the focus is on modeling marriage, the techniques can be applied to other types of psychological phenomena as well.
