Transportation Operations Research - Dartmouth College

The transportation problem represents a particular type of linear programming problem used for allocating resources in an optimal way; it is a highly useful tool for managers and supply chain engineers for optimizing costs. The IpSolve R package allows to solve LP transportation problems with just a few lines of code. While there are other free optimization software out there (e.g. GAMS, AMPL, TORA, LINDO), having stored an LP transportation problem R code in your personal code library could ...

Operations Research in Transportation Systems: Ideas and ...

The transportation problem in operational research is concerned with finding the minimum cost of transporting a single commodity from a given number of sources (e.g. factories) to a given number of destinations (e.g. warehouses). These types of problems can be solved by general network methods, but here we use a specific transportation algorithm.
