A Little History of the World

Illustrated Edition *Yale University Press*

E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

A History of the World in 12 Maps *Penguin*

A New York Times Bestseller “Maps allow the armchair traveler to roam the world, the diplomat to argue his points, the ruler to administer his country, the warrior to plan his campaigns and the propagandist to boost his cause... rich and beautiful.” – Wall Street Journal Throughout history, maps have been fundamental in shaping our view of the world, and our place in it. But far from being purely scientific objects, maps of the world are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the world, they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps - from the almost mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly individual view of the world. Brotton shows how each of his maps both influenced and reflected contemporary events and how, by considering it in all its nuances and omissions, we can better understand the world that produced it. Although the way we map our surroundings is more precise than ever before, Brotton argues that maps today are no more definitive or objective than they have ever been. Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again. “A fascinating and panoramic new history of the cartographer’s art.” – The Guardian “The intellectual background to these images is conveyed with beguiling erudition.... There is nothing more subversive than a map.” – The Spectator “A mesmerizing and beautifully illustrated book.” —The Telegraph

A History of the World in 100 Objects *Penguin UK*

This book takes a dramatically original approach to the history of humanity, using objects which previous civilisations have left behind them, often accidentally, as prisms through which we can explore past worlds and the lives of the men and women who lived in them. The book's range is enormous. It begins with one of the earliest surviving objects made by human hands, a chopping tool from the Olduvai gorge in Africa, and ends with an object from the 21st century which represents the world we live in today. Neil MacGregor's aim is not simply to describe these remarkable things, but to show us their significance - how a stone pillar tells us about a great Indian emperor preaching tolerance to his people, how Spanish pieces of eight tell us about the beginning of a global currency or how an early Victorian tea-set tells us about the impact of empire. Each chapter immerses the reader in a past civilisation accompanied by an exceptionally well-informed guide. Seen through this lens, history is a kaleidoscope - shifting, interconnected, constantly

surprising, and shaping our world today in ways that most of us have never imagined. An intellectual and visual feast, it is one of the most engrossing and unusual history books published in years.

History of the World in 100 Animals *Simon and Schuster*

'So, so good! ... More gems than a pirate's chest ... science, art, history, culture - it's epic and mammoth, a repository of all our truths through their lives' Chris Packham A powerful and fascinating insight into the 100 animals - from the blue whale to the mosquito - that have had the biggest influence on humanity through the ages. We are not alone. We are not alone on the planet. We are not alone in the countryside. We are not alone in cities. We are not alone in our homes. We are humans and we love the idea of our uniqueness. But the fact is that we humans are as much members of the animal kingdom as the cats and dogs we surround ourselves with, the cows and the fish we eat, and the bees who pollinate so many of our food-plants. In The History of the World in 100 Animals, award-winning author Simon Barnes selects the 100 animals who have had the greatest impact on humanity and on whom humanity has had the greatest effect. He shows how we have domesticated animals for food and for transport, and how animals powered agriculture, making civilisation possible. A species of flea came close to destroying human civilisation in Europe, while the slaughter of a species of bovines was used to create one civilisation and destroy another. He explains how pigeons made possible the biggest single breakthrough in the history of human thought. In short, he charts the close relationship between humans and animals, finding examples from around the planet that bring the story of life on earth vividly to life, with great insight and understanding. The heresy of human uniqueness has led us across the millennia along the path of destruction. This book, beautifully illustrated throughout, helps us to understand our place in the world better, so that we might do a better job of looking after it. That might save the polar bears, the modern emblem of impending loss and destruction. It might even save ourselves.

The United States in World History *Routledge*

Davies examines key themes in the evolution of America from colonial rule to international supremacy. Atlantic world, 1700–1800, the US and the industrial world, and the emergence of America as a global power. The United States in World History explores such key issues as: the dynamics of the British Atlantic community the American revolution the impact of industrialization on the US the expansion of US consumer and cultural industries the Cold War, and its implications for the US. Part of our successful Themes in World History series, The United States in World History presents a new way of examining the United States, and reveals how concepts that originated in America's definition of itself as a nation – concepts such as capitalism, republicanism and race – have had supranational impact across the world.

Rise and Fall

A History of the World in Ten Empires

Rise and Fall opens with the Akkadian Empire, which ruled over a vast expanse of the region of ancient Mesopotamia, then turns to the immense Roman Empire, where we trace back our western and eastern roots. Then, while Europe was beginning to emerge from a period of cultural stagnation, it almost fell to a whirlwind invasion from the East, at which point we meet the Emperors of the Mongol Empire . . . Combining breathtaking scope with masterful concision, Paul Strathern traces connections across four millennia and sheds new light on these major civilizations - from the Mongol Empire and the Yuan Dynasty to the Aztec and Ottoman, through to the most recent and biggest Empires: the British, Russo-Soviet and American. Charting 5,000 years of global history in ten succinct chapters, Rise and Fall makes comprehensive and inspiring reading to anyone fascinated by the history of the world.
