Pulp A Linear Programming Toolkit For Python

Linear Programming (LP), also known as linear optimization is a mathematical programming technique to obtain the best result or outcome, like maximum profit or least cost, in a mathematical model whose requirements are represented by linear relationships. Linear programming is a special case of mathematical programming, also known as mathematical optimization.

Python | Linear Programming in Pulp - GeeksforGeeks

PuLP supports open source linear programming solvers such as CBC and GLPK, as well as commercial solvers such as Gurobi and IBM’s CPLEX. The default solver is CBC, which comes packaged with PuLP upon installation. For most applications, the open source CBC from COIN-OR will be enough for most simple linear programming optimisation algorithms.
