Chapter 3 - Fuel System 4 of 56 The threaded area and hinge parts should be lubricated with a small amount of fuel lube so that adjustments can be made easily as the cap must have a snug fit in the tank filler neck to compensate for the vent line built into the inside radius.

CHAPTER THREE FUEL SYSTEM (FUEL TANKS FUEL LINES TIP TANKS ...

The fuel injection system is a key component of the DI gasoline engine. It should have the capability of providing both late injection for stratified charge combustion at part load and early injection during the intake stroke for homogeneous charge combustion at high load operations.

Fuel Injection System - an overview | ScienceDirect Topics

History of Fuel Injection The duplex delivery valve was first proposed by Eugene Tartrais of France in 1921, and he was granted U.S. patent No. 1,492,111 on it in 1924. It consisted of a

small valve inside of the main valve and opening in the opposite direction. Thus, when fuel delivery from the pump ceased and the main valve seated, the high pressure in the discharge tubing was relieved
