(PDF) Indigenous Peoples and Biodiversity

The recognition that local and indigenous people have their own ecological understandings, conservation practices and resource management goals has important implications. It transforms the relationship between biodiversity managers and local communities. While previously they were perceived simply as resource users, indigenous people are now recognised as essential partners in environmental management.

Indigenous Knowledge and Biodiversity - UNESCO

Indigenous communities have been involved in accessing funds and participating in GEF-funded projects in the areas of biodiversity, sustainable land management, international waters, climate change and POPs. Indigenous involvement has been by far the greatest in the biodiversity focal area, as indigenous communities are closely tied to land, forests,

Indigenous Communities and Biodiversity

Indigenous Peoples and local communities manage more than half of the world's land. These biodiverse ancestral lands are vital to the people who steward them and the planet we all share. But governments only recognize indigenous and community legal ownership of 10 percent of the world's lands. Secure tenure is essential for safeguarding the existing forests against external
