International Classification of Diseases - Wikipedia

International Classification of Diseases (ICD), in medicine, diagnostic tool that is used to classify and monitor causes of injury and death and that

maintains information for health analyses, such as the study of mortality (death) and morbidity (illness) trends. The ICD is designed to promote international compatibility in health data collecting and reporting.

International Classification of Diseases | Britannica

Abstract. The ninth revision of an international classification of diseases accepted and used throughout the world for the coding of mortality and morbidity statistics and the indexing of hospital records. Revisions in this ninth edition respond to the need in several countries to satisfy clinical requirements by structural changes in

the classification as well as by providing increased specificity.
