The Grammar of the English Tense System

A Comprehensive Analysis *Walter de Gruyter*

The Grammar of the English Tense System forms the first volume of a four-volume set, The Grammar of the English Verb Phrase. The other volumes, to appear over the next few years, will deal with mood and modality, aspect and voice. The book aims to provide a grammar of tense which can be used both as an advanced reference grammar (for example by MA-level or postgraduate students of English or linguistics) and as a scientific study which can act as a basis for and stimulus to further research. It provides not only a wealth of data but also a unique framework for the study of the English tense system, which achieves great predictive and explanatory power on the basis of a limited number of relatively simple rules. The framework provided allows for an analysis of the semantics of individual tenses which reflects the role of tenses not only in locating situations in time relative to speech time but also in relating situations in time relative to one another to form temporally coherent discourse. Attention is paid to the relations between tenses. On the one hand, we can identify sets of tenses linked to particular temporal areas such as the past or the future. These sets of tenses provide for the expression of a system of temporal relations in a stretch of discourse in which all the situations are located within the same temporal area. On the other hand, there are many contexts in which speakers might in theory choose between two or more tenses to locate a situation (e.g., when we choose between the past tense and the present perfect to locate a situation before speech time), and the book examines the

difference that a choice of one or the other tense may make within a discourse context. The book moves from a detailed exploration of the meaning and use of individual tenses to a thorough analysis of the way in which tenses can be seen to function together as sets, and finally to a detailed examination of tenses in, and tenses interacting with, temporal adverbials. Original data is used frequently throughout the book to illustrate the theory discussed.

The Written Language Bias in Linguistics

Its Nature, Origins and Transformations *Routledge*

Linguists routinely emphasise the primacy of speech over writing. Yet, most linguists have analysed spoken language, as well as language in general, applying theories and methods that are best suited for written language. Accordingly, there is an extensive 'written language bias' in traditional and present day linguistics and other language sciences. In this book, this point is argued with rich and convincing evidence from virtually all fields of linguistics.

A Course Book in English Grammar

Standard English and the Dialects *Macmillan International Higher Education*

The study of language in written texts and transcripts of speech is greatly helped by a student's ability to identify and describe those prominent features of the grammar which make one variety of English different from another. A Course Book in English Grammar looks at many of the problems encountered by students and encourages them to find their own answers and to assess hypotheses about grammatical description. There are activities at each step, using authentic written and spoken data. Using 'real' texts avoids the faking of evidence to be found in some traditional grammar books, and interesting problems of analysis that arise in such texts are a source of useful discussion. The book has been thoroughly revised and expanded for this second edition, which contains additional chapters and material. A new opening chapter discusses the concept of 'grammatically correct English' and the differences between descriptive, prescriptive and proscriptive approaches to the writing of grammar books. The book is a systematic description of Standard English, and examples of contemporary spoken dialectal grammar are introduced and analysed to illustrate the differences between standard and nonstandard usage. A Course Book in English Grammar will prove invaluable to all students of English Language.
