Disposable and reusable nappies in the UK: life cycle ...

Life cycle assessment is a "cradle-to-grave" approach for determining the financial and environmental costs of a product over its entire life. 13, 14 There are few published life cycle assessment studies of medical items (ref. 3 in Table 1). 15 - 21 Our group recently performed a life cycle assessment of anesthetic drug trays, finding that reusable trays were both environmentally and financially advantageous to single-use trays. 19 Drug trays, however, do not require sterilization, an ...

A Life Cycle Assessment of Reusable and Single-Use Central ...

Life Cycle Assessment LCA is an internationally accepted and standardized method in DIN EN ISO 14040 (Deutsches Institut und für Normung, 2006). It considers environmental aspects and potential environmental impacts of a product or service throughout its whole life cycle - from raw material extraction through production and use up to final disposal.

Life cycle assessment of a disposable and a reusable ...

On the basis of such criteria, single-use disposable medical devices are increasingly supplanting reusable devices in the United States (US) and elsewhere. 1 Although purchase and maintenance costs for disposable devices are perceived to be less than for reusables, this fails to account for indirect costs to society from the environmental impacts attributable to the entire life cycle of a device. Such an analysis is commonly performed using life cycle assessment.
