your home ...

What is green building? A 'green' building is a building that, in its design, construction or operation, reduces or eliminates negative impacts, and can create positive impacts, on our climate and natural environment. Green buildings preserve precious natural resources and improve our quality of life.

What is green building? | World Green Building Council

Green building refers to both a structure and the application of processes that are environmentally responsible and resource-efficient throughout a building's life-cycle: from planning to design, construction,

operation, maintenance, renovation, and demolition. This requires close cooperation of the contractor, the architects, the engineers, and the client at all project stages. The Green Building practice expands and complements the classical building design concerns of economy, utility, durability

Green building - Wikipedia

The Green Construction Board has produced this guide to explain the principles of sustainable building in terms that are useful for the development of content for standards, qualifications, apprenticeships and training courses.

Sustainable Building Training Guide

Green building is popular in Europe, too, especially in Germany and the Netherlands, and the European Union has a jump start on the United States in terms of regulations. In the mid-1990s, it adopted requirements for energy usage in any new construction on the continent. The European Commission instituted a voluntary green building program in 2005.
