Bar Stock Model Steam Engine Plans

This engine was designed following a number of requests for a simple machining project. There are many other oscillating steam engine designs, and some are much simpler, using plumping fittings and wire links etc... However because this engine was designed to be a machining project, bar-stock was used for all the parts. The design had several key features : It used no castings and no brazing ...

Steam Engines - packrat workshop

All of our plans projects are machined from metal bar stock (supplied by the

builder) and no castings are required. This is the lowest cost way for you to build as the metals can usually be purchased from metal salvage yards for around \$2.00 or so per pound for aluminum, brass and stainless steel. But as can be seen, most of the model engines are designed to look like they were in fact made ...
