Algebraic topology shouldn't be an afterthought; it should be the main purpose of the first topology course and the first topology book! Assuming that, there are better choices. I'd suggest A First Course in Algebraic Topology (with illustrations on almost every page) and Basic Topology (Undergraduate Texts in Mathematics). The problem I have with all three, however, is that their first and only topic in algebraic topology is the fundamental group.

Topology; a first course (Book, 1974) [WorldCat.org]

Topology is the study of `spatial' objects. Many key topological concepts were introduced in the Metric Spaces course, such as the open subsets of a metric space, and the continuity of a map between metric spaces. More advanced concepts such as connectedness and compactness were also defined and studied. Unlike in a metric space, there is no notion of distance between points in a topological space.

A First Course in Algebraic Topology. Czes Kosniowski. This self-contained introduction to algebraic topology is suitable for a number of topology courses. It consists of about one quarter 'general topology' (without its usual pathologies) and three quarters 'algebraic topology' (centred around the fundamental group, a readily grasped topic which gives a good idea of what algebraic topology is).
