neglected.

The syntax of silence : sluicing, islands, and the theory ...

In syntax, sluicing is a type of ellipsis that occurs in both direct and indirect interrogative clauses. The ellipsis is introduced by a wh-expression, whereby in most cases, everything except the wh-expression is elided from the clause. Sluicing has been studied in detail in early 21st century and it is therefore a relatively well understood type of

ellipsis.
