Production and utilisation of biogas. Through more than 40 years of research and technological development in the biogas field, we have built up world-leading expertise, especially with regard to digestion of manure and small-scale biogas upgrading. We have knowledge of all parts of the biogas value chain, including waste management/planning and work from lab scale, via pilot scale and all the way up to the design and optimization of full-scale

production plants.

#### **BIOSOLIDS MANAGEMENT AND BIOGAS UTILIZATION**

Production and utilisation of biogas has numerous environmental advantages: (1) It is used as a renewable energy source. (2) It reduces the CH<sub>4</sub> emission to the environment. (3) It can be used as a substitute for fossil fuels. (4) It reduces the emission of CO<sub>2</sub> from combustion. (5) It can be used in all natural gas appliances after upgrading.
