A History of the World *Pan Macmillan*

Fresh, exciting and vividly readable, this is popular history at its very best. Our understanding of world history is changing, as new discoveries are made on all the continents and old prejudices are being challenged. In this truly global journey, political journalist Andrew Marr revisits some of the traditional epic stories, from classical Greece and Rome to the rise of Napoleon, but surrounds them with less familiar material, from Peru to the Ukraine, China to the Caribbean. He looks at cultures that have failed and vanished, as well as the origins of today's superpowers, and finds surprising echoes and parallels across vast distances and epochs. A History of the World is a book about the great change-makers of history and their times, people such as Cleopatra, Genghis Khan, Galileo and Mao, but it is also a book about us. For 'the better we understand how rulers lose touch with reality, or why revolutions produce dictators more often than they produce happiness, or why some parts of the world are richer than others, the easier it is to understand our own times.'

A Brief History of the World

Thirty-six lectures by Peter N. Stearns that provide a survey of the expanse of human development and civilization across the globe, beginning with the invention of agriculture in the Neolithic era and ending with the urbanized, technologically sophisticated world of the 21st century.

A Little History of the World

Illustrated Edition *Yale University Press*

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

A People's History of the World

From the Stone Age to the New Millennium *Verso Books*

A new edition of the bestselling comprehensive history of the world from the perspective of struggling peoples throughout the ages—with a foreword by Howard Zinn From the earliest human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of "Great Men," of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of "history from below." In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of

these developments. While many scholars see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress. "I have had many people ask me if there is a book which does for world history what my book A People's History of the United States does for this country. I always responded that I know of only one book that accomplishes this extremely difficult task, and that is Chris Harman's A People's History of the World." —Howard Zinn

A History of the World in 100 Objects *Penguin UK*

This book takes a dramatically original approach to the history of humanity, using objects which previous civilisations have left behind them, often accidentally, as prisms through which we can explore past worlds and the lives of the men and women who lived in them. The book's range is enormous. It begins with one of the earliest surviving objects made by human hands, a chopping tool from the Olduvai gorge in Africa, and ends with an object from the 21st century which represents the world we live in today. Neil MacGregor's aim is not simply to describe these remarkable things, but to show us their significance - how a stone pillar tells us about a great Indian emperor preaching tolerance to his people, how Spanish pieces of eight tell us about the beginning of a global currency or how an early Victorian tea-set tells us about the impact of empire. Each chapter immerses the reader in a past civilisation accompanied by an exceptionally well-informed guide. Seen through this lens, history is a kaleidoscope - shifting, interconnected, constantly surprising, and shaping our world today in ways that most of us have never imagined. An intellectual and visual feast, it is one of the most engrossing and unusual history books published in years.

A delightful read, gracefully written, and full of odd and interesting pieces of information as well as thoughtful comparisons that

span both time and space. —William L. O'Neill

A History of the World in 12 Maps *Penguin*

A New York Times Bestseller "Maps allow the armchair traveler to roam the world, the diplomat to argue his points, the ruler to administer his country, the warrior to plan his campaigns and the propagandist to boost his cause... rich and beautiful." - Wall Street Journal Throughout history, maps have been fundamental in shaping our view of the world, and our place in it. But far from being purely scientific objects, maps of the world are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the world, they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps - from the almost mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly individual view of the world. Brotton shows how each of his maps both influenced and reflected contemporary events and how, by considering it in all its nuances and omissions, we can better understand the world that produced it. Although the way we map our surroundings is more precise than ever before, Brotton argues that maps today are no more definitive or objective than they have ever been. Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite

the same way again. "A fascinating and panoramic new history of the cartographer's art." – The Guardian "The intellectual background to these images is conveyed with beguiling erudition.... There is nothing more subversive than a map." – The Spectator "A mesmerizing and beautifully illustrated book." —The Telegraph

A Political History of the World

Three Thousand Years of War and Peace *Penguin UK*

A three-thousand year history of the world that examines the causes of war and the search for peace In three thousand years of history, China has spent at least eleven centuries at war. The Roman Empire was in conflict during at least 50 per cent of its lifetime. Since 1776, the United States has spent over one hundred years at war. The dream of peace has been universal in the history of humanity. So why have we so rarely been able to achieve it? In A Political History of the World, Jonathan Holslag has produced a sweeping history of the world, from the Iron Age to the present, that investigates the causes of conflict between empires, nations and peoples and the attempts at diplomacy and cosmopolitanism. A birds-eye view of three thousand years of history, the book illuminates the forces shaping world politics from Ancient Egypt to the Han Dynasty, the Pax Romana to the rise of Islam, the Peace of Westphalia to the creation of the United Nations. This truly global approach enables Holslag to search for patterns across different eras and regions, and explore larger questions about war, diplomacy, and power. Has trade fostered peace? What are the limits of diplomacy? How does environmental change affect stability? Is war a universal sin of power? At a time when the threat of nuclear war looms again, this is a much-needed history intended for students of international politics, and anyone looking for a background on current events.

Basque History Of The World *Knopf Canada*

"They are a mythical people, almost an imagined people," writes Mark Kurlansky. Settled in a corner of France and Spain in a land marked on no maps except their own, the Basques are a nation without a country, whose ancient and dramatic story illuminates Europe's own saga. Where did they come from? Signs of their civilization exist well before the arrival of the Romans in 218 B.C., and their culture appears to predate all others in Europe. Their mysterious and forbidden tongue, Euskera, is related to no other language on Earth. The Basques have stubbornly defended their unique culture against the Celts, the Romans, the Visigoths and Moors, the kings of Spain and France, Napoleon, Franco, the modern Spanish state, and the European Union. Yet as much as their origins are obscure, the Basques' contributions to world history have been clear and remarkable. Early explorers, they made fortunes whaling before the year 1000 and became the premier cod fishermen in Europe after discovering Canada's Grand Banks. Juan Sebastian de Elcano, a Basque, was the first man to circumnavigate the globe in 1522. Their influence has also been felt in religion as founders of the Jesuits in 1534, and in business, as leaders of the Industrial Revolution in southern Europe. Mark Kurlansky's passion for the Basque people, and his exuberant eye for detail, shine throughout this fascinating history. Like his acclaimed *Cod*, it blends human, economic, political, literary and culinary history into a rich and heroic tale.

A History of World Order and Resistance

The Making and Unmaking of Global Subjects *Routledge*

This book combines theory with history to look into a dozen episodes of struggle over the concrete and situated terms of world ordering, and it finds reasons to think that the contemporary 'movement of movements' against neo-liberal globalization has deeper roots and a broader history than is usually recognized. Informed by case studies from the US, the UK, France, South Africa, Algeria, the Philippines and Jamaica, *A History of World Order and Resistance* examines how men and women are sometimes subjectified by world ordering, and how they sometimes make themselves true subjects of their own global history. The author, an expert on resistance to world ordering, situates the contemporary 'movement of movements' against neo-liberal globalization in a broader historical framework to argue that resistance to world ordering has not only developed its very own, unalienating, mode of relation to the world economy, but also sustained it over two hundred years, without political mediation or representations. Herein lies the heart of the on-going world revolution against capital. The book concludes with a radical polemic against the political organization of the multitude. *A History of World Order and Resistance* will be of interest to students and scholars of political theory, international political economy and globalization.

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical "episodes" that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students.
