First Revision No. 147-NFPA 20-2013 [Global Input]

NFPA 20 requires that a fire pump be supplied by a continually available power source, usually identified as an uninterrupted power source (NFPA 20-2013, Section 9.1.5 and 9.2.1). In many cases, this requirement necessitates that a backup generator be provided as a secondary source in the event of a power failure , in which case the fire pump controller must be equipped with an

automatic transfer switch .
