Home | Trauma, Critical Care & Acute Care Surgery Conference

Trauma surgery is a surgical specialty that utilizes both operative and non-operative management to treat traumatic injuries, typically in an acute setting. Trauma surgeons generally complete residency training in General Surgery and often fellowship training in trauma or surgical critical care. The

trauma surgeon is responsible for initially resuscitating and stabilizing and later evaluating and managing the patient. The attending trauma surgeon also leads the trauma team, which typically inclu

Trauma surgery - Wikipedia

Our long-term vision is to create a platform for translational research using trauma an acute-care surgery as a model for critical care. Our long term goal is pathway discovery, designed to illuminate unappreciated biologic pathways controlling the metabolic response to injury and illness.

Research | Division of Trauma and Surgical Critical Care

The Trauma Audit and Research Network had

also identified great variation in the standard of care across the country and other studies showed England's trauma care did not meet the standards of other countries, with almost 60% of major trauma patients receiving care that was less than good practice and avoidable deaths still occurring.
