...

This video talks about the circulatory and respiratory systems. It has an in-depth explanation on how the body uses its organs to respire. It also talks about the different parts of the lungs.

Circulatory/Respirat ory System - Human Body Systems 101

The Circulatory system helps nutrients and oxygen go to all the cells in your body, as well as collect wastes such as carbon dioxide. The Respiratory system inhales oxygen that is put in blood in the Circulatory system.

Respiratory/Circulat ory Systems - The

Human Body

Cell respiration needs a constant oxygen supply to provide us with enough energy, so we constantly need to breath and keep blood circulation going to deliver this oxygen and remove the carbon dioxide. The respiratory and circulatory systems need to work together. Let's briefly revise the main components involved.

Circulatory And Respiratory Systems Web Lab Answers

The circulatory system. The alveoli and capillaries in the lungs are the point at which the circulatory and respiratory system meet. When air comes into contact with capillaries, the oxygen in the air diffuses through the capillary walls. This diffusion happens because there is more oxygen in the lungs and less in the surrounding blood.
