However, it is widely accepted that, just like any research field, many SE researchers conduct "discovery" (ground-breaking) type of research activities, i.e., research which is not motivated by the "current" challenges in the software industry, but rather presenting ground-breaking new approaches to SE which could or would possibly improve SE practices in future, e.g., research on automated program repair which took many years to be gradually used by industry (Naitou et al. 2018).

Practical relevance of software engineering research ...

Abstract. Software engineering is a pragmatic discipline. From the very beginning, the mindset of the software engineering research community has been focused on solving problems faced by practicing software engineers [1], and hence, much of software engineering work is motivated by pragmatic outcomes. To this day, software engineering research results typically require at least a semi-plausible scenario by which they can be used by practicing software engineers to assist in their ...
