The TapRoot® System also has broad use in a variety of other industries including:

Using the TapRoot® System for Process Safety Incident ...

A taproot is a large, central, and dominant root from which other roots sprout laterally. Typically a taproot is somewhat straight and very thick, is tapering in shape, and grows directly downward. In some plants, such as the carrot, the taproot is a storage organ so well developed that it has been cultivated as a vegetable. The taproot system contrasts with the adventitious or fibrous root system of plants with many branched roots, but many plants that grow a taproot during germination go on to

TapRoot® was built (and is continuously improved) to help your company meet the ever increasing demands for improved safety, environmental stewardship, efficiency, regulatory compliance, and customer satisfaction. See how we can help you meet these challenges.

Manufacturing Professionals use TapRoot® Root Cause ...

Taproots are one of the three major types of root systems found in plants; the other two are adventitious root system and fibrous root system. Taproots arise from the radicle of a germinating embryo. The radicle of many plant species dies soon after maturation and, hence, the taproot gets converted into the fibrous root system in the later stages.

Taproot System: Types, Modifications and Examples ...

The TapRoot® System provides people the science to find and fix the causes of human error and equipment failure - whether it is reactively stopping low to medium risk incidents (the topic of this book) or investigating major accidents; or proactively improving performance by using the TapRoot® Techniques to find and fix a problem's root causes before an accident occurs.

TapRoot® - Book 3 Set: Using the Essential TapRoot ...

Plants with tap roots can be contrasted with plants that have a fibrous root system. Carrots are commonly-eaten tap roots. There are a number of ways in which a tap root can be beneficial to a plant. One of the most important is that it allows the plant to reach down quite far to find water to sustain itself.
