Backward Lesson Plan Template | Teachers Pay Teachers

Backward design, also called backward planning or backward mapping, is a process that educators use to design learning experiences and instructional techniques to achieve specific learning goals. Backward design begins with the objectives of a unit or course—what students are expected to learn and be able to do—and then proceeds “backward” to create lessons that achieve those desired goals.

Backward Design Definition - The Glossary of Education Reform

Backward design is a method of designing an educational curriculum by setting goals before choosing instructional methods and forms of assessment. Backward design of curriculum typically involves three stages: Identify the results desired What the students should know, understand, and be able to do Consider the goals and curriculum expectations Focus on the "big ideas" Determine acceptable levels of evidence that support that the desired results have occurred What teachers will accept as evidenc

Backward design - Wikipedia

The Backward Design Process The logic of backward design suggests a planning sequence for curriculum. This sequence has three stages, shown in Figure 1.1. In this section, we examine these stages and illustrate their application with an example of a design for a 5th grade unit on nutrition.
