### Demographic Responses to Economic and Environmental Crises

In this paper mortality crises in a rural area in southern Sweden are analysed by using a new approach. We start off with a combined life-event and time-series analysis approach in which the influences of food prices, agricultural production and air temperature on mortality by age, sex and socio-economic status is analyzed, much in line with our previous work. Special attention is given to ...

Updated February 16, 2020.

Demography is the statistical study of human populations. It includes the study

of the size, structure, and distributions of different populations and changes in them in response to birth, migration, aging, and death. It also includes the analysis of the relationships between economic, social, cultural, and biological processes influencing a population.
