To determine the available chlorine in the given sample of bleaching powder by the iodometric method. Principle. Bleaching powder is commonly used as a disinfectant. The chlorine present in the bleaching powder gets reduced with time. So, to find the exact quantity of bleaching powder required, the amount of available chlorine in the sample must be found out.

This part of ISO 7393specifies an iodometric titration method for the determination of total chlorine in water. The method is applicable for the measurement of concentrations in terms of chlorine (Cl2), from 0,01 mmol/l to 0,21 mmol/l (0,71 mg/l to 15 mg/l). Several substances interfere in the determination (see clause 10).

For each five samples were collected and analyzed using Mohr Method and the result for the average chlorine contents are 105.79mg/l for the Ajali raw mater, 129.70mg/l for reservoir and tap water is 178.63mg/l.

**DETERMINATION OF CHLORINE CONTENT IN WATER**

In this simulated lab exercise, the procedure for determining chlorine in a household bleach using the iodometric method is explained in detail. Every step of the protocol is carried out, from the weighing and dissolution of sodium thiosulfate used as titrant, until the final calculation of the concentration (as g / L of active chlorine in the sample) using the data of five determinations.

Again the percentage of available chlorine can be calculated through the concept of normality. The gram equivalent of bleaching powder is equal to the gram equivalent of the standard titrant you have used then calculate the %available chlorine by weight of chlorine/weight of bleaching powder\*100=amount of available chlorine

**Percent active chlorine - Wikipedia**

The determination of free chlorine in bleach is possible by a redox titration. The most common and successful method for use in high schools involves taking the sample of bleach converting the hypochlorite ion ( $\text{ClO}^-$ ) to iodine ( $\text{I}_2$ ) by the addition of KI and then titrating the iodine with standardized sodium thiosulfate solution.
