Key Points. • Palliative care is patient and family centered care. •

The illness affects both patient and family, and patient and family characteristics affect the illness. • Geographic and cultural factors influence who is considered as family and what is expected from them in the setting of illness.

Supporting Families in Palliative Care - Oxford Medicine

Palliative care is treatment, care and support for people with a life-limiting illness, and their family and friends. It's sometimes called 'supportive care'. The aim of palliative care is to help you to have a good quality of life – this includes being as well and active as possible in the time you have left.

What are palliative care and end of life care?

Palliative Care (pronounced pal-lee-uh-tiv) is specialized medical care for people with serious illness. This type of care is focused on providing relief from the symptoms and stress of a serious illness. The goal is to improve quality of life for both the patient and the family.

Palliative Care Patient Education Handouts | Get ...

While bereaved family members were most satisfied with end-of-life care provided by home hospice services, it is to be remembered that until today, most patients die in an institutional setting. Therefore there is a pressing need for palliative care in these settings in order to improve quality of care.

Patient and Family Satisfaction with End-of-Life Care

A patient's family and other people meaningful to them are important participants in the care process and need to be

recognised as such. Good communication and collaboration with families can be central to achieving high-quality care and good patient outcomes. Much care is provided by family members and other informal carers following discharge.

Family Partnerships, Palliative Care and End of Life ...

Palliative care involves a range of services delivered by a range of professionals that all have equally important roles to play – including physicians, nursing, support workers, paramedics, pharmacists, physiotherapists and volunteers -- in support of the patient and their family.

Palliative Care - WHO

They provide holistic care to the patient and family or caregiver focusing on the physical, emotional, social, and spiritual issues cancer patients may face during the cancer experience. Often, palliative care specialists work as part of a multidisciplinary team that may include doctors, nurses, registered dieticians, pharmacists, chaplains, psychologists, and social workers.

Palliative Care in Cancer - National Cancer Institute

The care recipient may be a member of the caregiver's family of origin or his or her family of choice, such as a friend or life partner. 1 Fiscal constraints in formal care provision means that patients in palliative care are now increasingly dependent on family members for care. 2 Indeed, a growing expectation that family members be involved directly in end-of-life care 3 4 are likely to increase demands placed on family caregivers in palliative care.

The supportive relationship between palliative patients ...

End of life care includes palliative care. If you have an illness that cannot be cured, palliative care makes you as comfortable as possible, by managing your pain and other distressing symptoms. It also involves psychological, social and spiritual support for you and your family or carers.

What end of life care involves - NHS

Families of patients receiving palliative care are profoundly affected by the challenges of the illness.

Palliative Care for Families: Remembering the Hidden Patients

In palliative care, we serve our patient and the family as a unit, and we extend the care to the family in grief after patient's death. Being the informal caregivers, family members are crucial in maintaining the well being of the patient at home. The well being of the patient in turn affects that of the caregivers.

Care for the Family in Palliative Care - fmskh.org

Care centred on the patient and family as a unit is core to the philosophy of palliative care. The goals of supporting family have been described as: meeting their needs; minimising their distress; improving their well being and ultimate outcomes; and empowering them to provide care.

Working With Families

Palliative care expands traditional disease-model medical treatments to include the goals of enhancing quality of life for

patients and family members, helping with decision making, and providing opportunities for personal growth. Palliative care can be rendered along with life-prolonging treatment or as the main focus of care."
