Worked Chemistry Problem Examples

Saturated ionic solutions may be used to decrease the solubility of organic compounds in the aqueous layer, allowing more of a compound to dissolve in the organic layer. If a desired product can hydrogen bond with water and is relatively small, it may be difficult to keep it in the organic layer when partitioning with an aqueous phase (K) will be <1 .

If you've worked in groups before and you know groups work well for you — particularly if you know the people who are going to be in the group — then that's great. Use group work to your advantage. But regardless of how you choose to study, you can't get through organic chemistry without working the problems.
