Terrace Farm Or Agriculture Design

In agriculture, a terrace is a piece of sloped plane that has been cut into a series of successively receding flat surfaces or platforms, which resemble steps, for the purposes of more effective farming. This type of landscaping is therefore called terracing. Graduated terrace steps are commonly used to farm on hilly or mountainous terrain.

Terrace (earthworks) - Wikipedia

Terrace farming is a method of farming whereby “steps” known as terraces are built onto the slopes of hills and mountains to be used for crop cultivation. Terrace farming is commonly used in Asia by rice-growing countries such as Vietnam, Philippines, and Indonesia. Terrace farming prevents the washing away of soil nutrients by the rains.

Terrace Farm Or Agriculture Design Guidelines

Install and maintain terraces for conservation. Encyclopedia Article. If you have sloping fields in your operation, terraces are a good water and soil management structure to adopt to minimize soil erosion and conserve soil moisture on steep slopes. The kinds of terraces that can be used (narrow-based, broad-based, or terrace channels) are flexible and can be adapted to your needs and the soil type, and they can be spaced according to the potential for erosion and equipment considerations.

Install and maintain terraces for conservation ...

The early constant grade terrace, first constructed during the 1930s and early 1940s, was and continues today as an excellent erosion control device. It is relatively easy to design and lay out in the field. It can be constructed using farm equipment. Grass turn rows or brush along the banks of a ditch or fence row often provide outlets.

Choosing Terrace Systems | MU Extension

To accommodate farm machinery and farming operations, design cropland terraces with long gentle curves. When multiple terraces are used in a field, design the terraces to be as parallel to one another as practicable. Capacity. Design terraces to have enough capacity to control the runoff from a 10-year frequency, 24-hour storm without overtopping.
