Atmospheric Pressure Winds And Circulation

General Circulation of Atmosphere. The Pattern of planetary pressure and winds in atmosphere, depends upon the following: The latitudinal variation of atmospheric heating; Emergence of pressure belts; migration of belts following apparent path of Sun. Distribution of continents and oceans. Rotation of Earth.

Pressure and Winds in Atmosphere - Geography Study ...

Wind exists because of horizontal and vertical differences (gradients) in pressure, yielding a correspondence that often makes it possible to use the pressure distribution as an alternative representation of atmospheric motions. Pressure is the force exerted on a unit area, and atmospheric pressure is equivalent to the weight of air above a given area on Earth's surface or within its atmosphere.

Atmospheric circulation, any atmospheric flow used to refer to the general circulation of the Earth and regional movements of air around areas of high and low pressure. On average, this circulation corresponds to large-scale wind systems arranged in several east–west belts that encircle the Earth. In the subtropical high-pressure belts near latitudes 30° N and 30° S (the horse latitudes), air descends and causes the trade winds to blow westward and

Upper Level Winds Within the atmosphere, there are different levels of air circulation. However, those in the middle and upper troposphere are an important part of the entire atmosphere's air circulation. To map these circulation patterns upper air pressure maps use 500 millibars (mb) as a reference point.

Winds and the Pressure Gradient Force - ThoughtCo

The global wind belts are enormous and the winds are relatively steady. These winds are the result of air movement at the bottom of the major atmospheric circulation cells, where the air moves horizontally from high to low pressure. Technology today allows anyone to see global wind patterns in real-time, such as Earth Wind Map. Take a look at the Earth Wind Map and determine what patterns you can see occurring in the atmosphere in real-time.
