It is essential reading for scientists, researchers and R&D professionals working in the field of AI with applications in the fashion and textile industry; managers in the fashion and textile enterprises; and anyone with an interest in the applications of AI.

Artificial Intelligence on Fashion and Textiles | SpringerLink

Abstract. Textiles are common materials for many medical applications. They are used, for example, as bandages, medical stockings, or scrubs. Developments during the last 10 years in the areas of wearable electronics, smart textiles and material research offer new possibilities to create medical textiles with a higher level of functionality and allow the development of completely new active medical textiles.
