A Visual Course of Sculpting Techniques: 270 Photographs to Learn how to Model Clay Busts in the Round *Independently Published*

A visual Course of Sculpting techniques 270 photographs to learn how to model clay busts in the round This is the second in a series of thematic visual courses in which I will share with the readers my long sculpting and designing experience. Through 270 commented colour pictures, I will guide curious and passionate readers in the realization of an all-round clay portrait, starting with the pictures of a face. The text provides all the information about the most suitable kind of clay, the tools to work it and the advice to bake it in the oven. It also provides instructions on how to take excellent pictures of the subject, from which we will take inspiration for the portrait. The pictures effectively demonstrate the correct positions and movements of the hands and tools, in order to correctly and profitably model clay. The course is not aimed at expert sculptors but at those who wish to start learning about the art of sculpture. The techniques shown here are the result of

the author's 40-year-long experience as a sculptor, as well as of his experience as a teacher in the Italian High School and in his private courses. From his life-long experience, the author has learnt that, if you want to teach something, images are much more effective than words. By consequence, this manual is mainly made up of photographs followed by short explanations. In the e-book edition the pictures are in colour, while in the paper book they are black and white, to reduce printing expenses. All the same, as the colour of clay is grey, this has no negative impact on the effectiveness of the course. I cannot guarantee you will reach perfection at your first attempt, but I can assure that the method shown in this manual is the quickest one to achieve excellent results.

Ceramics for Beginners *Lark Books (NC)*

The classic guide is back, with four new projects, updated galleries, and a fresh introduction! With plenty of how-to images, *Ceramics for Beginners* teaches four basic techniques--pinching, slab building, coiling, and dowel work--for making beautiful human and animal figures. Twelve projects range from a pinch-pot pig to a bird-relief tile, and there's advice on setting up a studio or home workspace, slips, and glazes.

The Essential Guide to Mold Making & Slip Casting *Sterling Publishing Company*

For potters, mold making is invaluable because it allows them to slip-cast identical multiples of their work and this newly revised, now in color edition of Andrew Martin's classic is the definitive guide to the craft. No other volume has shown the processes in such how-to

detail. It's overflowing with hundreds of photos, key techniques, projects, master artist profiles, and troubleshooting tips. A thorough introduction addresses materials and tools, and presents Martin's simple, unique template method for making clay prototypes. Create easy one-piece molds to make tiles, bowls, and platters, or multi-piece molds for more complex forms. An extensive overview covers slip formulation, while offering highly desired slip recipes for low-, mid-, and high-fire clay bodies. This will be the standard reference in every ceramist's library.

A Potter's Workbook *University of Iowa Press*

In *A Potter's Workbook*, renowned studio potter and teacher Clary Illian presents a textbook for the hand and the mind. Her aim is to provide a way to see, to make, and to think about the forms of wheel-thrown vessels; her information and inspiration explain both the mechanics of throwing and finishing pots made simply on the wheel and the principles of truth and beauty arising from that traditional method. Each chapter begins with a series of exercises that introduce the principles of good form and good forming for pitchers, bowls, cylinders, lids, handles, and every other conceivable functional shape. Focusing on utilitarian pottery created on the wheel, Illian explores sound, lively, and economically produced pottery forms that combine an invitation to mindful appreciation with ease of use. Charles Metzger's striking photographs, taken under ideal studio conditions, perfectly complement her vigorous text.

Complete Ceramics *Collins & Brown*

Complete Ceramics marries modern appeal with an age-old craft. This book

features a collection of techniques beginning with basics such as making pinch pots, coil building and slab construction to more advanced techniques such as throwing and mould-making. All techniques are followed by several inspiring projects such as the square-slabbed dish and square porcelain wall boxes. Once familiarised with the basics, the reader can progress to more advanced projects, which include glazing and wheel projects. Each project is designed to appeal to both the beginner and the seasoned potter. In addition to step-by-step instructions for all techniques, this must-have reference book also features a history of the subject and information about various clays and kilns. No matter your age or skill level, *Complete Ceramics* is guaranteed to be a classic in both style and content. (25,000 words) • Over 20 classic and contemporary ceramic projects • Features beginner, immediate and advanced techniques • Each chapter includes beginner, intermediate and advanced projects • Beautiful photography and concise instructions accompany each project *Collins & Brown* is proud to expand on this ever-popular series with this new title that will surely win over young and trendy crafters. Ceramic, Art and Civilisation *Bloomsbury Publishing*

In his major new history, Paul Greenhalgh tells the story of ceramics as a story of human civilisation, from the Ancient Greeks to the present day. As a core craft technology, pottery has underpinned domesticity, business, religion, recreation, architecture, and art for millennia. Indeed, the history of ceramics parallels the development of human society. This fascinating and very human history traces the story of ceramic art and industry from the Ancient Greeks to the Romans and the medieval world; Islamic ceramic cultures and their influence on the Italian Renaissance; Chinese and European porcelain production; modernity and Art Nouveau; the rise of the studio potter, Art Deco, International Style and Mid-Century Modern, and finally, the contemporary explosion of ceramic making and the postmodern potter. Interwoven in this journey through time and place is the story of the pots themselves, the culture of the ceramics, and their character and meaning. Ceramics have had a presence in virtually every country and historical period, and have worked as a commodity servicing every social class. They are omnipresent: a ubiquitous art. Ceramic culture is a clear, unique, definable thing, and has an internal logic that holds it together through millennia. Hence ceramics is the most peculiar and extraordinary of all the arts. At once

cheap, expensive, elite, plebeian, high-tech, low-tech, exotic, eccentric, comic, tragic, spiritual, and secular, it has revealed itself to be as fluid as the mud it is made from. Ceramics are the very stuff of how civilized life was, and is, led. This then is the story of human society's most surprising core causes and effects.

It Comes Around Again

Rudy Autio, one of the important figures in the contemporary clay movement beginning in the 1950s, discusses his early days growing up in a Finnish immigrant family in Butte, Montana, his time in the Navy at the end of WWII, the start of the Archie Bray Foundation in Helena, Montana, with Peter Voulkos, and his building methods of early murals using brickyard clay. Later he helped K Ross Toole, the new director of Montana Historical Society Museum in Helena, with a number of dioramas there in 1954, especially the Lewis and Clark diorama. He then was hired at University of Montana in Missoula to build a ceramics program by President McFarland. He discusses noteworthy students he learned from during his 28-year teaching career and various commissions he built during those years, like the Grizzly, the ceramic murals for Polson, Walla Walla, and Helena. In the 1970s workshops in ceramics demonstrations became popular, especially after the first SuperMud conference, and Rudy describes some of these. Later chapters explore his first trips to Finland, meeting relatives and artists alike. He discusses ways his work changed throughout his life.

Inside Japanese Ceramics *National Geographic Books*

This practical and supremely useful manual is the first comprehensive,

hands-on introduction to Japanese ceramics. The Japanese ceramics tradition is without compare in its technical and stylistic diversity, its expressive content, and the level of appreciation it enjoys, both in Japan and around the world. *Inside Japanese Ceramics* focuses on tools, materials, and procedures, and how all of these have influenced the way traditional Japanese ceramics look and feel. A true primer, it concentrates on the basics: setting up a workshop, pot-forming techniques, decoration, glazes, and kilns and firing. It introduces the major methods and styles that are taught in most Japanese workshops, including several representative and well-known wares: Bizen, Mino, Karatsu, Hagi, and Kyoto. While presenting the time-tested techniques of the tradition, author Richard L. Wilson also accommodates modern technologies and materials as appropriate. Wilson has gathered a wealth of information on two fronts—as a researcher of Japanese pottery and art history, and as a potter who has studied and worked for years with master Japanese potters. In his introduction, he provides a short history of Japanese ceramics, and in closing he looks beyond traditional methods toward ways in which Western potters can make Japanese methods their own. Richly illustrated with 24 color plates, over 100 black-and-white photographs, and over 70 instructive line-drawings, *Inside Japanese Ceramics* is indispensable for potters as well as connoisseurs and collectors of Japanese ceramics. Above all, it is an invitation to participate—to study, make, touch, and use the exquisite products of the Japanese ceramic tradition.

Modeling the Ecorche Human Figure in Clay

This book is meant for those people or artists, Sculptors, Painters, or Students studying human anatomy or Fine Art. As a Sculptor, Netra Khattri has made this book with the language of Art (Sculpture), how muscles attach to the human skeleton, and from where the muscle originates and inserts with muscle function. Initially, Netra Khattri thought of human muscles as sculptures, beginning to end with skeletons, partial muscled figures, and the origin and function of muscular structures. For example, the reader can look at the skeleton to see how the bones and muscles are constructed in this process of evolution and metamorphosis. Nevertheless, there are more interesting facts in human anatomy than here. The difference between this book shows the Ecorche sculpting process is finished anatomical references rather than, other anatomy book shows drawings of muscles attach with bone and structures of human anatomy.

Sustainable Ceramics *Bloomsbury Publishing*

Artists are increasingly interested in

producing work that is not only beautifully designed and produced, but is also environmentally friendly and socially responsible. In Sustainable Ceramics, pioneer Robert Harrison draws on more than four decades of making, and a wealth of experience shared by other artists to present practical possibilities for ceramic artists. This book covers all the factors to consider when going 'green', from fuels and alternative firing technology to energy-saving methods, sustainable ways to collect and use clay itself, and ways to deal with or recycle waste materials and save water. He suggests simple and achievable methods by which to reduce the carbon footprint of ceramic art, and draws on interviews and examples throughout by practitioners who reclaim, reuse and recycle in their studio or work. Sustainable Ceramics is an essential resource for any ceramicist, studio or school looking for ideas on how to reduce the impact of their practice on the environment.

Modelling and Sculpting the Figure *Herbert Press*

The human figure in sculpture is a powerful form, capable of great expression and depth. Sculpting the figure in any medium is a rewarding practice, but one that presents special challenges for the maker. Tanya Russell, founder and principal of the Art Academy in London, details the whole creative process for sculpting the figure, from the fundamental conceptual and practical considerations through to the finished and presented work. She covers essential tools and equipment, methods for building armatures, and the processes for creating not only realistic, but also abstract and expressive figures, in a variety of styles and materials.

Techniques are supported by practical exercises with step-by-step instructions and images. The book is filled with the inspiring works of contemporary sculptors, all of whom are tutors, students, or alumni of the Art Academy. *Modelling and Sculpting the Figure* is an essential companion for beginners and established artists alike.

Pinch Pottery *Lark Books (NC)*

Presents information on making pinch pottery, including creating complex structures by combining simple shapes and the basics of color and surface decoration, plus step-by-step, illustrated instructions for nine pottery projects.

My Life As a Potter *Harbour Publishing*

Modeling the Figure in Clay, 30th Anniversary Edition *Watson-Guptill*

For thirty years, *Modeling the Figure in Clay* has been an indispensable anatomical resource for people who think, see, and understand form best in the round: sculptors. In the thirtieth anniversary edition of this classic work, master sculptor Bruno Lucchesi invites you on a guided tour of the human form. Follow him as he creates a figure in clay—literally from the inside out—starting with the skeleton, laying on the muscles to show male and female anatomy, and finishing with a complete figure sculpture with every detail of face and hair carefully modeled. BRUNO LUCCHESI's work has been added to the collections of the Whitney Museum of American Art, the Brooklyn Museum, and the Dallas Museum, among many others. Lucchesi has received awards from the National Academy, the National Arts Club, and the Architectural League. He was a Guggenheim Fellow in 1962-1963, he won a Gold Medal award from the National Academy of Design in 1990, and was awarded the Polich Tallix Foundry Prize from the National Sculpture Society in 2009.
