Resource Management In Real Time Systems And Networks

Information resource management involves identifying data as an asset, categorizing it and providing various types of active management. Experts describe IRM as the process of managing the life cycle of data sets, from their creation to their use in IT architectures,

and on to archiving and eventual destruction of non-permanent data.

What Is Information Resource Management (IRM) ...

IRM includes the management of (1) the broad range of information resources, e.g., printed materials, electronic information, and microforms, (2) the various technologies and equipment that manipulate these resources, and (3) the people who generate, organise, and disseminate those resources. Overall the intent of IRM is to increase the usefulness of government information both to the government and to the public.

Information Resource Management (IRM) - CIO Wiki

Network resource management is the process of managing and allocating resources for networking processes. You can assign the resources differently depending on the amount of network traffic that is being processed. By managing and allocating resources according to the actual need, you increase the system's efficiency when processing packets.
