Artificial neural networks (ANNs), usually simply called neural networks (NNs), are computing systems vaguely inspired by the biological neural networks that constitute animal brains. [1] An ANN is based on a collection of connected units or nodes called artificial neurons , which loosely model the neurons in a biological brain.

Artificial neural network - Wikipedia

Two neural networks have been constructed, trained and validated using the data from finite element simulations. The first neural network, the classifier, was used to predict whether a set of input variables is physically feasible. The second neural network, the calculator, was used to calculate specific energy and specific power. Comparison between the neural networks and finite element simulations demonstrated that both the two neural
