I find this book rather deep in learning with kernels and i suggest it as a reading for starting PhD (and master?) students to get in grasp with concepts. And then delve into more details. The book itself is nicely organized by topics and is not at all to be read chapter by chapter.

Bernhard Schölkopf - Google Scholar

A comprehensive introduction to Support Vector Machines and related kernel methods. In the 1990s, a new type of learning algorithm was developed, based on results from statistical learning theory: the Support Vector Machine (SVM). This gave rise to a new class of theoretically elegant learning machines that use a central concept of SVMs--kernels-for a number of learning tasks. Kernel machines ...

Learning with Kernels - Bernhard Schoelkopf, Alexander J ...

These methods formulate learning and estimation problems in a reproducing kernel Hilbert space (RKHS) of functions defined on the data domain, expanded in terms of a kernel. Working in linear spaces of function has the benefit of facilitating the construction and analysis of learning algorithms

while at the same time allowing large classes of functions.
