Introduction. The modern theory of Markov processes has its origins in the studies of A. A. MARKOV (1906-1907) on sequences of experiments "connected in a chain" and in the attempts to describe mathematically the physical phenomenon known as Brownian motion (L. BACHELIER 1900, A. EINSTEIN 1905). The first correct mathematical construction of a Markov process with continuous trajectories was given by N. WIENER in 1923.
