Problem Set 7 Solution Quick overview: Although relativity can be a little bewildering, this problem set uses just a few ideas over and over again, namely 1. Coordinates $(x;t)$ in one frame are related to coordinates $(x_0;t_0)$ in another frame by the Lorentz transformation formulas. 2.

Answer - Open Yale Courses

In Special Relativity problems, you relate the observations made by two observers in different reference frames measuring the same thing. Therefore, useful pictures are pictures of the motion being described with the two observers and

the experiment (the thing that they are measuring) clearly indicated. The relative velocity of the two observers should also be shown.

Time dilation, in the theory of special relativity, the “slowing down” of a clock as determined by an observer who is in relative motion with respect to that clock. In special relativity, an observer in inertial (i.e., nonaccelerating) motion has a well-defined means of determining which events occur simultaneously with a given event. A second inertial observer, who is in relative motion ...
