At last, I've taken time and ventured a little deeper into the Python language! I used the Tkinter package to develop a rip-off of an android game called chain-reaction.It's a simple multiplayer board game in which the first person to occupy all the blocks on the board or of the opponent(s) wins.

PvP Chain reaction game using Python

A chemical chain reaction proceeds by a sequence generally subdivided into three stages: (1) Initiation, in which a reactive intermediate, which may be an atom, an ion, or a neutral molecular fragment, is formed, usually through the action of an agent such as light, heat, or a catalyst.

Chain reaction | chemistry | Britannica

Fission chain reactions and their control. The emission of several neutrons in the fission process leads to the possibility of a chain reaction if at least one of the fission neutrons induces fission in another fissile nucleus, which in turn fissions and emits neutrons to continue the chain. If more than one neutron is effective in inducing fission in other nuclei, the chain multiplies more rapidly.
