To address these issues, the American College of Obstetricians and Gynecologists (ACOG) has released evidence-based guidelines for management of abnormal cervical cytology and histology. The...

ACOG Releases Guidelines for Management of Abnormal ...

The new pap smear guidelines (2012) recommend that a woman's first pap smear should be when she is 21 years old and not before. Being sexual active does not change this recommendation. For women age 21 to 29, only "cytology testing," which looks for abnormal or unhealthy cells under a microscope, should be used.

ThePapApp

In contrast to ASCUS, neither observation nor a repeat Pap smear is an option because the potential for abnormalities is much higher in the AGUS smear. Management is based on the AGUS subclassification (if given) and the patient's age. To continue reading this article ...

Managing ASCUS and AGUS Pap smears | MDedge ObGyn

Pap results showing ASCUS cells are one of the most common abnormalities seen. If the HPV test results are negative, and a patient has a Pap abnormality showing ASCUS cells, a follow-up Pap test is usually recommended in three years. If the hybrid capture test results are positive, with ASCUS, a colposcopy is recommended.
