Role of Agricultural Mechanization in Conservation ...

Mechanization is a crucial input for agricultural crop production and one that historically has been neglected in the context of developing countries. Factors that reduce the availability of farm power compromise the ability to cultivate sufficient land and have long been recognized as a source of poverty, especially in sub-Saharan Africa. Increasing the power supply to agriculture means that more tasks can be completed at the right time and greater areas can be farmed to produce greater ...

Why mechanization is important | Sustainable Agricultural ...

“Broadly speaking mechanization of agriculture has two forms mobile mechanization and the stationary types of mechanization. The former attempts to replace animal power on which agriculture has been based for very many centuries; while the latter aims at reducing the drudgery of certain operations which have to be performed either by human labour or by a combined effort of human beings and animals.”
