Earth Has a New Continent Called 'Zealandia', Study Reveals

There are seven continents in the world: Africa, Antarctica, Asia, Australia/Oceania, Europe, North America, and South America. However, depending on where you live, you may have learned that there are five, six, or even four continents. This is because there is no official criteria for determining continents.

Continents Of The World

There are 7 continents in the world: Asia, Africa, Europe, North America, South America, Australia, and Antarctica. 6 of them are divided into many countries and territories. 7 Continents World Capitals

7 continents of the world and their countries

However, Europe is widely considered a continent with its comparatively large land area of 10,180,000 square kilometres (3,930,000 sq mi), while South Asia, with less than half that area, is considered a subcontinent. The alternative view—in geology and geography—that Eurasia is a single continent results in a six-continent view of the world.

Continent - Wikipedia

The building in front of which the Four Continents stands now houses a branch of the Smithsonian Institute's National Museum of the American Indian an organization that sees the diversity of the world's cultures in a light quite different from Daniel Chester French and Gilbert Cass in 1903. In a pamphlet about the building and its history, the ...

New York Public Art Curriculum | Art Works

Within a few years of Columbus's "discovery," it became clear that the huge land masses west of those islands were not Asia. The whole area constituted a "New World," as far as Europeans were concerned, in contrast to the "Old World" that they already knew about, i.e., Europe, Africa, and Asia.
