The effects of rural-urban migration on corporate ...

Natural resource management is the management of natural resources such as land, water, soil, plants and animals, with a particular focus on how management affects the quality of life for both present and future generations. Natural resource management deals with managing the way in which people and natural landscapes interact. It brings together land use planning, water management, bio-diversity conservation, and the future sustainability of industries like agriculture, mining, tourism, fisheri

Natural resource management - Wikipedia

We want the sustainable management of natural resources to be fundamental to all decision making in the public, private and voluntary sectors. We would also like to see the avoidance of damage to the natural environment and maximising social, cultural, economic and environmental benefits of decisions becomes the norm.
