Accessible Rich Internet Applications (ARIA) is a set of attributes that define ways to make web content and web applications (especially those developed with JavaScript) more accessible to people with disabilities. It supplements HTML so that interactions and widgets commonly used in applications can be passed to assistive technologies

ARIA - Accessibility | MDN

A rich web application is a web application that has many of the characteristics of desktop application software. The concept is closely related to a single-page application, and may allow the user

interactive features such as drag and drop, background menu, WYSIWYG editing, etc. HTML5 is a current standard for delivering rich web applications, supported by all major browsers.
