Hedge accounting is an accountancy practice, the aim of which is to provide an offset to the mark-to-market movement of the derivative in the profit and loss account. There are two types of hedge recognized. For a fair value hedge, the offset is achieved either by marking-to-market an asset or a liability which offsets the P&L movement of the derivative. For a cash flow hedge, some of the derivative volatility is placed into a separate component of the entity's equity called the cash flow hedge
