Symmetries and Overdetermined Systems of Partial ...

Symmetries in various forms pervade mathematics and physics. Globally, there are the symmetries of a homogenous space induced by the action of a Lie group. Locally, there are the infinitesimal symmetries induced by differential operators, including not only those of first order but of higher order too.

Symmetries and Overdetermined Systems of Partial ...

Often these structures are themselves derived from partial differential equations whilst their symmetries turn out to be constrained by overdetermined systems. This leads to further topics including separation of variables, conserved quantities, superintegrability, parabolic geometry, representation theory, the Bernstein-Gelfand-Gelfand complex, finite element schemes, exterior differential systems and moving frames.
