Description This monograph is the last volume in the series 'Acoustic and Elastic Wave Fields in Geophysics'. The previous two volumes published by Elsevier (2000, 2002) dealt mostly with wave propagation in liquid media.

Acoustic and Elastic Wave Fields in Geophysics, III ...

When an S-wave in an elastic medium propagates to the interface at an angle α of inclination of the wave front, some of the oscillations are transmitted to the acoustic layer, forming a response: a P-wave propagating at an angle β between its front and the interface. We called these responses from S-waves in acoustic media rS-waves.

For acoustic reverse-time migration, wavefield reconstruction is done with the acoustic wave-equation using the recorded scalar data as boundary condition. In contrast, for elastic reverse-time migration, wavefield reconstruction is done with the elastic wave-equation using the recorded vector data as boundary condition.

In this work, we present a solution to the acoustic scattering problem by a fluidic sphere. The method is based on multipole expansion coefficients for a general acoustic field, which is applied to two common acoustic fields: stationary waves and arbitrarily located Bessel beams of orders $m = 0$ and $m = 1$.We present a new solution for the acoustic radiation force in terms of pressure and ...

Bulk acoustic waves have been used to deform osmotically swollen erythrocytes in glass capillaries by acoustic radiation forces. However, only elastic effects were considered, and the cell number was low ($n = 8$). 23 Many of these techniques suffer from complex experimental setups or low cell numbers.
