Table of Contents

Power analysis is a form of side channel attack in which the attacker studies the power consumption of a cryptographic hardware device. These attacks rely on basic physical properties of the device: semiconductor devices are governed by the laws of physics, which dictate that changes in voltages within the device require very small movements of electric charges (currents).

Power analysis - Wikipedia

Power analysis attacks allow the extraction of secret information from smart cards. Power analysis attacks : revealing the secrets of smart ...

In power analysis attacks, the attacker attempts to reveal secret information that is stored inside the device, on the basis of the cryptographic device's power consumption. This targeted information is typically a secret key that is used for a cryptographic algorithm, so we refer to this information as the secret key for the remainder of this article.

Power Analysis Attacks and Countermeasures
