The King KN-64 DME represents a
compromise between the KN-62 and
KN-62A DMEs. It is a current production
model, like the KN-62A, but typically
sells for roughly the price of a KN-62
(check current prices). The trade-off is
that the KN-64 is a less powerful model
than either the KN-62 or KN-62A.

Both the KN 62A and KN 64 can be channeled remotely through almost any NAV receiver or tuned directly with their own frequency selection knobs. They even have dual channeling capability, making two DME frequencies available to you at all times - one remote with one stored internally. So what you have, in effect, is a functional DME Hold Mode.

The TSO'd KN 63 is a complete 100 watt, 200-channel remote DME system utilizing Large Scale Integrated (LSI) circuit technology. Offering significant advantages in DME reliability and performance, the KN 63 is all solid-state (no transmitter tubes) and can be installed with either single or dual panel indicators.

During the Bendix and King merger (i.e.
Bendix/King), a new part numbering
system was created that converted
these 9 digit part numbers to 12 digits.
Therefore, 066-3056-01 became
066-03056-0001. Despite this numbering
change, units that were originally from
the King Radio design still have the 9
digit part number format on the unit
dataplate.
