Goodrich and Luke capture the developmental concerns of LGBTQI individuals throughout the life cycle as they establish and maintain intimate relationships, create families, encounter career concerns, and navigate other milestones and transitions. Illustrative case examples and interventions throughout the text, as well as warnings and recommendations, make this an ideal resource for practice and group work courses. After a discussion of the history of group work with the LGBTQI community, the planning and process issues that group leaders should consider in their work, and relevant ethical and legal concerns, the authors explore a range of group types and pertinent issues. Individual chapters focus on the following types of counseling: child and adolescent; same-gender adult; intersex and transgender; coming out/disclosure; school, community outpatient, and residential; couples and family; substance abuse; grief and loss; and advocacy. Chapters on group work supervision and the importance of allies round out the book. *Requests for digital versions from ACA can be found on www.wiley.com. *To purchase print copies, please visit the ACA website. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org.
