Genera Graminum Grasses Of The World

Poaceae or Gramineae is a large and

nearly ubiquitous family of monocotyledonous flowering plants known as grasses. It includes the cereal grasses, bamboos and the grasses of natural grassland and species cultivated in lawns and pasture. The latter are commonly referred to collectively as grass. With around 780 genera and around 12,000 species, the Poaceae is the fifth-largest plant family, following the Asteraceae, Orchidaceae, Fabaceae and Rubiaceae. The Poaceae are the most economically impor

The most famous modern grass
taxonomist at Kew is Derek Clayton. He

assembled data on all grasses of the world and published the reference book *Genera Graminum* in 1986. This compendium of information allowed the study of grass diversity to take a leap forwards, and paved the way for later computerised systems.
